# HE BEST FOUR ROSES.

MAMAN COCHET. Everblooming; charming, roay Pink.
MAMAN COCHET. Everblooming; charming, soft White.
HELEN GOULD. Everblooming; the rich, Crimson Cochet.
ETOILE DELYON. Everblooming; the rich, Golden Cochet.

hardy, healthy, vigorous, free-blooming and everblooming. All bear charming, pointed buds, which develop into enormous, faultiess flowers, double, deep and full; exquisite in rich and lovely coloring; surpassingly beautiful in form and fragrance. They are the evenu of the cram of all hardy everblooming Roses. If you grow but four plants they should be these Roses.

## These 4 Roses Free.

Send a Dollar Order for Seeds selected from this GUIDE, to reach me by March 1st, 1906, and these four, well-rooted Rose plants will be mailed you early in May, in time for planting. After March 1st, the Roses will cost you 25 cents. This offer is to encourage early orders. Don't delay. Tell your friends of this liberal offer.

GEO.W.PARK, SEEDSMAN & FLORIST. LA PARK, LANCASTER CO., PA.

### INDEX AND GERMINATION TABLE.

I'vit satisfaction and success. Many seeds are condemned and neglected before they have had sufficient time to start. Always divide the packages and sow at different times. You can then give them a second or third trial. Sow seeds that start about the same time together. Keep the seed box or bed moist, but not wet, and do not let the soil dry out until the seeds have had ample time to germinate. Seeds are influenced by conditions, and the plants may appear 25 per cent. earlier or 25 per cent. Later than the table indicates, according to circumstances. The figures in this list indicate the page in the Guide where the seeds are offered and priced. Following is the key to germination: a, 5 days; b, 8 days; c, 10 days, etc. The dagger (†) added means that the seeds may take much longer time than stated, some lying dormant for weeks or months, or a year before starting.

Solution	may take much lo	er time than stated, some lying dormant for weeks or months, or s	a year before starting.

Always keep a record of the date of sowing, and refer to the above table to know approximately when to expect the plants. Hang this Guide up, that you may know where to find it when wanted. Those marked (†) are not sure to come up promptly. Nearly all shrubs might be so marked. For other information on seeds, plants and flowers see Park's Floral Magazine, published monthly on fine paper at 25 cents a year, or on cheaper paper at 10 cents a year.

Geo. W. Park. La Park, Lancaster Co., Pa.

# INTRODUCTORY REMARKS.

HIRTY-SIX YEARS of constant service as a seedsman and florist, have drawn to me the esteemed patronage of more than half a million flower-loving people, many—very many of whom have become my warm friends. Every year I am greeted with their orders, accompanied with kind words, and often addi-I am greeted with their orders, accompanied with kind words, and often additional orders, solicited from flower-loving neighbors, thus affording pleasant, friendly intercourse, and an assurance that my efforts to serve them faithfully and well are appreciated. One-half of the business man's life is spent in his business, and the other half in his home, and happy indeed, is that life where both the business and home contribute to his happiness. The harmonious and genial nature of those who love the beautiful makes the florist's life one of pleasure instead of drudgery, and thus the years come and so, with him in a continuous round of satisfaction. drudgery, and thus the years come and go with him in a continuous round of satisfaction

and enjoyment. I need hardly tell my friends that I owe to, and give them the best attention and most faithful service at my command. Those who have dealt with me know this, and my growing trade will indicate it to others. My aim is to please and satisfy all who entrust me with their orders. I would always rather lose profits than a patron's confidence and trade. My business has doubled many times by the sons and daughters of the family growing up and establishing new homes, and bestowing their patronage where father and mother had been satisfactorily served for many years. And it has also been doubled many times by the good words of friends and the personal solicitation of orders among neighbors. I rejoice in the confidence thus manifested, and will ever guard and protect it as a sacred possession

protect it as a sacred possession. I try to so conduct my business that it is brought right to your home. My various Catalogues describe what I offer, and state the prices. Simply make out your order, enclose it with the amount, and mail to me. I guarantee the letter to reach me safely, and the seeds, plants or bulbs, to be sent by mail or express, prepaid, and safely delivered right to your door. If a mistake occurs, or if there is damage or loss in transit, I will

right to your door. If a mistake occurs, or if there is damage or loss in transit, I will make all good. If you are not satisfied complain to me at once, not to a friend or neighbor. You will find me ever ready to listen to any reasonable complaint.

Owning and operating the printing house and electrotype foundry where my publications are issued, as well as farms, gardens and greenhouses for the production of seeds, bulbs and plants, and having my expenses further curtailed by the use of a first-class water-power, I can profitably sell goods of the best quality, at prices that would ruin many a seedsman not so favorably provided. I never deal in cheap or inferior seeds. I sell only the best. Park quality means the best quality, and I challenge comparison. And now, appreciating and feeling thankful for the favors of my friends in the past, I solicit and anticipate their continued patronage, and also trial orders from those who have not yet dealt with me. My offerings are all of the new crop, and of tested vitality, while I am assured that the quality is unsurpassed. I therefore await the pleasure of my friends, believing they will be more than pleased with the treatment they receive, and the success they will attain with the seeds, bulbs and plants supplied.

La Park, Lanc. Co., Pa., January 1, 1906.

GEO W. PARK.

GEO W. PARK. La Park, Lanc. Go., Pa., January 1, 1906.

P. S .- Remit by Money Order, Express Order, Draft or Registered Letter. Sums of 10 or 25 cents send in stamps or coin.

PARK'S FLORAL MAGAZINE.—To further aid those who cultivate flowers, as well as to advance the general interests of floriculture, I publish a monthly Magazine devoted entirely to flowers. It was established in 1871, and has been continuously published by me ever since. It is now the oldest and most popular floral journal in the world, having a circulation of over 400,000 copies monthly. It is original, practical, and fully illustrated, and is the favorite Magazine among amateur florists. Only 10 cents a year, or for the edition upon fine paper, 25 cts. Sample copies free upon request.

SPECIAL { Park's Floral Magazine, one year, - - - - - - 10 Cts.} TOTAL, For 25 Cts. { Seeds, your selection from Guide, value 25c, trial price, 15 " } 25 (ts.

This offer is to encourage new subscriptions. The full subscription price (10c) must always be sent to get the seeds (25c worth) at the trial price of 15c. In other words, 25c either in stamps or coin must be sent with your order. Tell your friends of this offer.

TO INSURE SUCCESS.—With every package of seeds, bulbs and plants I send directions for culture, thus insuring success. I wish, however, to here impress the fact that many failures are due to lack of knowledge of time required by seeds to germinate. Study the table on preceding page to avoid failures from this cause. Always divide the packets and make several sowings.

SELECTING AND SOWING.—If you wish seeds to sow in a garden bed, or to present to children, or if you have had but little experience in raising flowers from seeds, select such flowers as Alyssum, Asters, Balsams, Calendula, Candytuft, Indian Pink, Gaillardia, Helianthus, Marigold, Mignonette, Bedding Petunia, Pansy, Phlox, Ricinus, Scabiosa, Tropæolum, Valerian, Verbena, Zinnia. For vines get Cobœa, Cypress, Dolichos, Gourds, Humulus, Ipomea, Morning Glory, Mauradya, Tropæolum peregrinum and Thunbergia. Even in sowing these it is well to prepare the bed carefully in a sunny exposure, place a low broad frame around it, and after sowing, water, and cover with a newspaper until the plants appear. If you sow seeds in the open and allow full exposure to rain and wind and sunshine, you should not complain if but few of the seeds become plants. In a protected bed sowing can be done earlier than in an open one, as extra covering of paper or boards can be applied on cold nights.

GET UP A CLUB.—Park's Floral Magazine one year, with a premium of ten packet of Cheice Floral

GET UP A CLUB.—Park's Floral Magazine one year, with a premium of ten packets of Choice Flower Seeds (my choice. See Magazine) will be sent for 15 cents. At this price subscriptions are easily obtained. Send for blank lists and particulars.

# \* Park's Superior Flower Seeds.

Park's Primroses.

Mr. Park: My Primroses started in May, began to bloom November 15, and such beauties, all large, thrifty plants, and the individual blossoms as large as a 50-cent piece, Colors white, pink and the darkest crimson I ever saw. Margaret Armstrong, Dubuque Co., Ia, Oct. 11, 1905. est and best. See page 56,57, 58.

### Park's Gloxinias.

Mr. Park: April 26,1904,I sow-ed half of a 3-cent packet of your mixed Gloxinias. September 5, s over 3 1/2 inches wide, beautiful cream white, with a deep purple edge. I raised 32 plants from that half, and this spring have 26 plants from the other half. Mrs. Jos. B. Goff, Worces-GLOXINIA half. Mrs. Jos. B. Goff, Worces-ter Co., Mass., Oct. 12,1905. See 54.

### Park's Cinerarias.

Mr. Park: My Cinerarias from your seeds were grand. Among others, one was richest purple, one deep crimson with yellow centre; but the crowning beauty of all was a large crimson one, with white eye. They bloomed with white eye. They bloomed continuously, over two months. E. J. Bailey, Quebec, Can., Oct. 13, 1904. Park's are the finest. See page 52.

### Park's Gaillardias.

Mr. Park: Last year I got a package of your Gallardia seeds, and nearly every seed came up. The plants have been in bloom all summer, and are still loaded with buds and blossoms. are yellow and brownish-red and are beautiful made up with white flowers in bouquets. Mrs. R. E., Mower Co., Minn. Park's improved. See p. 18.

### Park's Asters.

Mr. Park: The Asters from your seeds were a grand sight, the wonder and admiration of Some were tall and stately, others dwarf and low; some blos somed early, others late; and the somed early, others late; and the flowers were of every color, shade and hue—red, pink, purple, lav-ender, yellow and white, some with incurved petals like a Chry-santhemum. Mrs. H. C.Calhoun, Washtenaw Co., Mich., Oct. 11, 1904. Park's Asters. See page 7.

### Park's Balsams.

Mr. Park: My Balsams from eds were marvels of beauty. The plants branched, and every branch became a wreath of bloom, every flower perfect. They just simply reigned queen of the garden, and everybody here is going to buy Balsam seeds of Park next year. Mrs. R. K. Woodyard, Johnson Co., Mo., Nov. 9, 1905. Buy of Park. See 10.

### Park's Carnations.

Mr. Park: Your Carnations are beautifully colored, double, fragrant and as large as a dollar. I sowed the seeds in March, and the plants began to bloom in four months. They like rich, moist soil and partial shade. They thrive on the east porch in Summer and east window in winter Walter Roundbush, Tippecanoe Co., Ind., Oct. 4, '05. p. 12, 43, 46,51.

### Park's Pansies.

Mr. Park: Your Giant Pansies Nearly every seed grew, and the blossoms were grew, and the blossoms were as large as a silver dollar. Next year I am going to have a circu-lar bed, with each row a differ-ent color, and shall get Park's Romer's Giant Pansies of you, as there are none better. Mrs. as there are none better. Mrs. Roy Mead, Nobles Co., Minn., Oct. 10, 1905. See page 25.

### Park's Petunias.

Mr. Park: From one packet of your Petunia seed I raised some of the finest flowers I ever saw. Many measured over four inches across, while the colors were beautiful and rich, ranging were beautiful and rich, ranging from pure white to dark purple, some handsomely veined and variegated. Mrs. A. D. Thomp-son, Fremont Co., Iowa. See page 26 and 27.

### Park's Phlox.

Mr. Park: I advise all to grow your Annual Phlox. I got a your Annual Phlox. I got a package from you last spring and divided with a friend. We both had quite a had a both had quite a bed, for itseemed that every seed grew. The plants began to bloom when quite small and continued a mass of bloom, in all the rich colors, until frost in October. Mrs. Geo. Jewell, Isanti Co. Minn., Oct. 30, 1905. See page 27

### Park's Ten Weeks Stocks.

Mr. Park: I had twenty or thirty Plants from the packet of Ten Weeks Stock bought of you. I gave many plants to friends who admired them. They developed long spikes of blossoms, very double and fragrant. For continuous blooming I have nothing that excels them. Annie Dobbie, Norton Co., Kas., Oct. 6, 1905. See page 33.

Mr. Park: The Sweet Peas.
Mr. Park: The Sweet Peas
seeds I bought of you last spring
grew nicely, and the blossoms
were exquisite—so many varieties and colors, and such large
rich-scented blossoms borne on
long stems. They were by far
the prettiest Sweet Peas I ever
grew. Mrs J. H. Owen, Wyoming Co., N. Y., Oct. 24, 1905. See
page m.
Park's Von.

## Park's Verbenas.

Mr. Park: From a-3-cent VERBENA Mr. Park: From a-3-ent packet of your large-flowered fragrant Verbenas I had many different colors, and the flowers were produced freely and continuously. I set some in an urn and they were a mass of fragrant bloom all summer. I have potted one for my window, delecate pink with a fragrance like Trail-ing Arbutus. Mrs. G. L. Clark, Bormie P. O., Me., Oct. 9, 1905.

## Park's Zinnias.

Mr. Park: I got a packet of your Mammoth Zinnias in the your Mammoth Zinnias in the spring, and they were a surprise—as double and showy as any dahlia, and more free-blooming. They were the finest Zinnias in this part of the country. Some grew four feet high, and the flowers were of all colors. Every one who saw them admired them. May Preston, Douglas Co., Mo., Oct., 30, 1905. See p. 35.

GAILLARDIAS

My Business was established in 1868, and I have always given it my best thought and attention, that I might serve my patrons satisfactorily. My prices are low, but the quality of my seeds is PARK QUALITY—ALWAYS FIRST QUALITY. At La Park I have gardens and reenhouses, mills and warehouses, printing office, electrotype foundry, seed and bulb stores, postoffice and all he needs of a big business, economically and satisfactorily operated. My motto is "Big sales and small profits," and my esteemed patrons have the benefit of my complete and economical faither, you want first-class eeds send me your order. Quality is always first—price secondary, and I guarantee prompt and faithful service,

The handsome engravings in this book are mostly original, and all persons are warned against reproduc-

# Ageratum, New Large=Flowered.

Special Mixture, all colors, 4 packets 10 cents, 1 packet 8 cents.

Beautiful feathery clusters of blue and white flowers, continuously born throughout the season. Plants grow and bloom well in a sunny exposure, and are fine for edging and beds, also for pots. The new, large-flowered sorts are of especial beauty.

I can also supply tall Mexicanum, blue and white, Iasseauxi, pink, and Little Dorrit, blue and white, at 5 cents each per packet. Special mixture, all varieties and colors, 4 packets, 10 cents; 1 packet, 3 cents.

Mr. Park:—From a three-cent packet of Ageratum Seeds I had plants enough for myself and some for my chors. The border of my Canna bed was a sheet of blue.—Mrs. H. S. McWhorter, Seneca Co., N. Y. Nov.

Anemone coronaria, showy flowers of various colors, mixed.

Artemisia annua, grows 3 feet high with Fern-

# Antirrhinum Giant Fragrant.

Special mixture, 4 packets 10 cts., 1 pkt. 3 cts.

The new large-flowered, fragrant Antirrhinums or Snapdragons are very desirable garden or pot plants. They are easily started from seeds, and the plants soon come into bloom, branching freely, and every branch becoming a charming spike of large, scented, rich-colored flowers, the colors ranging through the splendid shades of white, rose, splendid shades of white, rose, crimson, scarlet, yellow, orange and dark purple, many varieties showing distinct variegations, as striped, spotted, blotched. These new varieties are a great improvement upon the old-fashioned Snapdragons, and are superb bedding plants, blooming freely the entire season. They grow about two feet high. My special mixture contains all of the choice colors. the choice colors

White ..... 5 Chamois ..... 5 carlet ..... 5 Rose ..... Striped .....

4 pkts 10 cts., 1 pkt 3 cts.

dwarf, for pots, edgings and beds; special mixture, 4 pkts 15 cts., 1 pkt

Mr. Park: I had a fine bed, of your new large-flowered Fragrant Snap-dragons this year—so many rich and beautiful colors. They were splendid. I mean to have a large bed next year. They are so easily raised from seeds.—Mra. M. C. Webster, Lewis Co., Wash., Nov. 25, 1905.

Arctotis grandis, a new annual 2 feet high with large, lavender - white, daisy - like flowers. 4 pkts 10 cts., 1 pkt...

ALONSOA

Acacia lophantha, an easily-grown Fern-like plant of great beauty; it is of rapid growth, and

plant of great beauty; it is of rapid growth, and makes a fine appearance either in a pot or a shady bed near the house. Always give plenty of root room. Pinch to promote bushy growth. See engraving. 4 pkts. 10 cts., 1 pkt. 5 cts.

\*\*Alonsoa\*\*, lovely pyramidal plants blooming profuserly and continuously; dowers mostly shades of rich scarlet. A. gracilis, A. Warscewiczii, A. Mutisi, and A. myrtifolia, are all good for either pots or beds. See engraving. Mixed. 4 packets 10 cents, 1 packet 3 cents. The varieties separate, 5 cts. pkt.

SWEET ALYSSUM.

AMARANTHUS TRICOLOR.

SWEET ALYSUM. AMARANTHUS TRICOLOR.

Alyssum, Sweet, Early, free and continuous blooming annuals; flowers white, in fine clusters, and deliciously scented; excellent for edging and baskets, and the sprays fine for cutting. See engraving. A pkts. 10 cts., 1 pkt. 3 cts.

Amaranthus, showy variegated-leaved plants of easy culture, useful for bedding, as well as for pots; like poor soil and a sunny situation. Joseph's Coat (or Amaranthus tricolor. See engraving.) Fountain Plant, Prince's Feather, Love Lies Bleeding, etc., belong here, and can be supplied at 5 cts. perpkt.; all sorts mixed 4 pkts. 10c., 1 pkt. 3c.

Special Mixture, all colors, 4 packets 10 cents, 1 packet 3 cents.

# Park's Superb Double Asters.

Complete Special Mixture, 4 packets 10 cents, 1 packet 2 cents.

These are splendid annuals for either beds or pots and deserve general cultivation. The plants are easily grown from seeds, and always bloom well in rich soil in a sunny situation. The flowers are very double, are borne on long stems, show the richer shades of red and blue as well as white, and are fine for cutting. My seeds are the product of German and French specialists, and are sure to yield the most satisfactory results. My mixtures are specially prepared, and contain the colors in fine proportion.

Mr. Park:—You should have seen my fine Asters this summer raised from your seeds. They were simply beyond comparison.—Chas. W. Brookens, Franklin Co., Pa., Oct. 4, 1905.

Mr. Park: Last Spring I bought Aster seeds of you, at prices so low I did not expect much, but the results were quite as satisfactory as from the more expensive seeds I bought of other florists. I usually raise a thousand plants. I had a very fine display this year. People come ten miles to see them.—Geo. D. Carrier, Chautauqua Co., N. Y., Oct., 1905.

Mr. Park: Out of a three-cent packet of mixed Aster seeds, I raised quite a large bed of the most beautiful Asters I ever saw. They were the wonder of the neighborhood, and were of every color I ever saw in Asters, and so easy to raise.—Mrs. Bertie Jewell, Isanti Co., Minn., Oct. 9, 1995.

Mr. Park: If your patrons wish something very fine they should try Park's Asters. A few cents spent in the direct varieties will furnish an shundance of cut flowers, besides making a fine show in the garden.—Mrs. M. C. Bramhall, Bradford Co., Pa., Nov. 11, 1905.

## Giant Victoria Aster.

A Grand Double Recurved Variety.

Special Mixtures, 4 pkts. 15 cts., 1 pkt. 5 cts.
This is one of the finest Asters, exceedingly showy and beautiful. Plants grow two feet high, branch freely, and each branch bears several huge, double, open flowers, as shown in the engraving. Set ten inches apart in a bed, they make a gorgeous display in autumn. Fine also for pots. I offer the choicest seeds in the leading colors, as follows:

Colors, as lono as.	
Pure white	Dark blue 5
White, rose tint 5	Silver gray 5
Peach-blossom 5	Carmine 5
Rose 5	Scarlet 5
Light blue 5	Brown violet 5
	, 1 pkt 5
	L. A . P ST (1) A TOT

mit. Park: I bought a packet of your New Giant Vic-toria Aster seeds, and they did elegantly and deserve great praise. I had plenty of fine large flowers for my-self, and could carry nice bouquets to my friends who were disappointed in theirs.—Mrs. E. C. Slade, Dela-ware Co., N. Y.

### Giant Perfection Aster.

A Grand Double Incurved Variety. Special Mixture, 4 pkts. 15 cts. 1 pkt. 5 cts.

The Improved Perfection Aster, is the most beautiful and showy of the incurved varieties. The plants are strong, of upright growth, two feet high, and bear magnificent, large, incurved flowers as represented in the above engraving. The colors are very rich, and some flowers are charmingly varies and

with

Pure White 5	Flesh color

Azure 5	white
Dark blue 5	Brilliant blackish
Brilliant rose 5	with white
Fiery scarlet 5	Sky blue and whit
Deep blood-red 5	Purple
special mixture of all color	

Mr. Park: Your Perfection Asters are lovely, and so easily raised. My bed showed many colors, as white, pink, blue, purple, variegated, etc. I wonder how many of the floral sisters have tried them.—Augusta Oldfield, McPhearson Co., Kans.

# New Hohenzollern Aster.

Special mixture, 4 packets 15 cents, 1 packet 5 cents.

Perhaps the largest, most attractive and most beautiful of the Plume Asters is the New Hohenzollern race, which originated with the famous German Specialist, Mr. Frederick Romer. The plants are of luxuriant growth, and bear freely enormous, perfectly double flowers, from five to seven inches in diameter, of the most charming colors, every flower twisted and curled as indicated in the engraving, thus forming a great, fluffy ball not unlike a Japanese Chrysanthemum. This is one of the glorious varieties, either for pots or beds, that everyone should have. I offer the choicest seeds, direct from the originator, Mr. Ræmer, and they will be found far superior to the seeds of this variety mostly sold. My special mixture contains all the fine colors, and the packets are as liberal as such choice seeds can be offered. I hope all my friends will try this grand feathery Aster.

Blue white 5 | Rosy lilac 5 | Azure blue 5 | Brilliant carmine Bright rose 5 | Crimson 5 | Carmine rose White, changing Dark blue 5 | Flesh color 5 | Lavender 5 | Lavender 5 | to rose 5 | Crimson 5 | Carmine rose 5 | Carmine ro

## Park's Yellow Quilled Aster.

4 pkts. 10 cts, 1 pkt. 3 cts.

This is the best yellow Aster to date. Plants grow two feet high, and are covered with large double quilled flowers, which last a long time.

Mr. Park: All the Aster seeds I got from you last spring did well, but your Silver Cloud and Yellow Quilled Asters deserve special praise, for they were beautiful-so large and free blooming. Mrs. F. L'Calkin, Linn Co., Mo., Nov. 4.

Mr. Park: I bought of you a packet of Hohenzollern Asters, and of all the Asters I ever raised they were the finest. Such large blossoms, crimped and curled and such lovely colors, white, red, purple, pink, etc., Each plant was a bouquet in itself, with its big double fuffy blossoms. A friend had lots of pretty Asters, but mine were pronounced, by those who saw them, to be the best. Mrs. E. J. Putnam, Allegheny Co., N. Y., Oct. 10, 1905. the best. M Oct. 10, 1905.

## Cocardeau or Crown Aster.

Special mixture, 4 pkts. 10 cts. 1 pkt. 3 cts. Grows 18 inches high, bearing large, full double flowers of rich colors, the centre

Rose, carmine, crimson, violet, blue and lilac, each ... 5 Special mixture, all varieties, 4 pkts. 10 cts., 1 pkt..... 3

Mr. Park: Your Cocardeau or Crown Asters were just lovely, and were greatly admired by myself and friends. Anna Strain, Jasper Co., Ia. Nov. 29.

friends. Anna Strain, Jasper Co., Ia. Nov. 29.

Dear Mr. Park: I can truthfully say that the Hohenzollern Asters which I purchased of you, are the finest in cultivation. They are the largest and most beautiful of all Asters, and very easy to grow. I have had great success with them, and advise all flower-lovers to get ino other but Park's Asters. Stanley Gibson Ont., Oct. 16, 1906.

Mr. Park: I hear people complain of seeds proving unsatisfactory, I always advise them to send to Park, whose seeds never fail to mature, if properly attended to. Hazel Hamilton, King Co., Wash.

# Park's Fine Bedding Aster.

Special Mixture, 4 pkts. 15 cts., 1 pkt. 5 cts.

I offer a compact, dwarf Aster for beds, that cannot be surpassed. The plants are bushy, as represented in the small sketch, and when in bloom the bed is a glorious mass of exquisite flowers, exceedingly handsome whether grown in separate colors or in mixture. The plants are less than a foot high, and should be set six or eight inches apart each way. The engraving shows a bed of these Asters in mixed colors, with a border of Cerastium Biebersteinii. The packets of mixed Aster seeds, costing 15 cts. will make enough plants for a large bed, and two packets of

Cerastium, costing 5 cts., will yield plants for a thick border, the whole seed expense for the bed being 20 cents. Sow the seeds of both in boxes in April, and transplant in May. The plants do best in a sunny bed, mulched with fine stable litter, after the last hoeing.

Pure white . Light blue ... Dark blue ...

Mr. Park: I bought a packet of your Bedding Aster seeds last spring. It contained all the colors that belong to the Aster family. The plants produced the finest flowers I ever saw. I took a bouquet of them to a picnic and they were admired by every one present. I had to tell them where I got my seeds.—M. E. W., Chautauqua Co., N. Y., Nov. 10.

## Aster, Park's Ostrich-feather.

Special Mixture, 4 pkts. 10 cts., 1 pkt. 8 cts.

The elegant plumy flowers of the Japanese Chrysanthemum are fairly represented in the splendid strain of Ostrich-feath-er Aster which I offer. The plants grow eighteen inches high, and in autumn produce enormous double flowers as shown in the engraving, and of all the rich colors from white to almost black, as follows:

cts., 1 pkt. 3 cts.

cts., 1 pkt. 3 cts.

Mr. Park: The Ostrich-feather Asters from your seeds were of immense size, like Japanese Crysanthemums,measureing five inches across, with long petals curiously curled, so as to give them a striking resemblance to the Chrysanthemum. Eva Shipley Frances, Wheeler Co., Neb., Nov. 24, 1903.

Mr. Park: My Ostrich Plume Asters from your seeds are lovely, being the largest flowers and most delicate shades I have ever seen in Asters. I am much pleased with them. Mrs. Ed w in W. Mace, York Co., Maine, Oct. 25, 1905.

Mr. Park; My Asters almost rival the Chrysanthemums. I wish you could have

Chrysanthemums. I wish you could have seen them in bloom. Lizzie B. Deisher, Berks Co., Pa., Sept. 16, 1905.

### Queen of the Earlies.

Special Mixture 4 pkts. 10 cts. 1 pkt. 3 cts,

The earliest Aster. Flowers very double and of many colors. Fine for beds or pots. White rose, crimson, light blue, dark red, red lilac, searlet, scarlet, so, white, each, wo. 50c, per pkt. 5 Special mixture, all colors, 4 pkts. 10 cts., 1 pkt. 3 cts. Mr. Park: My Asters, Queen of the Earlies, were perfection of their kind—plants an even height, color finely mixed, flowers perfectly double and all in bloom at one time. Mrs. John Henderson, Ont. Can.

## Park's Marvel Aster. Price 4 pkts, 10 cts. 1 pkt. 3 cts.

Grows two feet high, bearing large glob-ular flowers, pure white with a blood-red centre. The color contrast is odd and grand.

Mr. Park: Your Marvel Asters were the handsomest flowers I ever raised. I think every seed grew. I had a fine bed. Alzima Martin, Eric Co., Pa., Nov. 2, 1903. Park's seeds are the best and cheapest. I thank you many times for letting us have the seeds at a small price. Lizzie B. Deisher, Berks Co., Pa., Sept. 16, '06.

# Park's Silver Cloud Aster.

Pure White, 4 pkts. 10 cts., 1 pkt. 3 cts.

Those who wish a glorious bed of white bloom in autumn should sow a few packets of Park's Silver Cloud Aster. The plants are graceful in habit and bear large, perfectly double flowers, delicate in texture, faultless in form, and held up by strong stems. Elegant for bouquets or vases when cut. I can also supply colors as follows: Lavender, Shell Pink, Crimson and Indigo Blue, at 5 cents per packet, or all in mixture, including the white, 4 pkts. 10 cts. 1 pkt. 3 cts. See engraving.

Mr. Park: My bed of Silver Cloud Asters is to-day a grand sight. It is 3x9 feet and oh, such fine blossoms! They do not care about a little frost, so I did not try to get them earlier.—Mrs. C. E. Kinney, Pierce Co., Wash., Nov. 1, 1903.

### Dwarf Chrysanthemum Aster

Special mixture, 4 pkts 10 cts., 1 pkt 3 cts.

A splendid sort. Plant grows a foot high, and in late autumn are a mass of large double flowers of many colors. Fine for either pots or beds. Set 8 inches

Pure white, light blue, dark blue, flery scarlet, rose, 

### Boltz's Dwarf Bouquet Aster. Mixed, 4 packets 10 cents, 1 pkt 3 cents.

This is a very dwarf sort, the blooming plants appearing as little mounds of color, as shown in the en-graving. Set plants five inches apart

### New Victoria Aster.

Special mixture, 4 pkts. 10 cts. 1 pkt. 3 cts.

One of the best Asters, either for pots or beds, 18 inches high, well branched and bearing large, very double flowers, imbricated and of the richest colors.

## Parks Harlequin Aster.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Beautiful. Flowers very double, graceful, and of many colors, checkered white. Eighteen inches high, free-blooming, odd and attractive. This curious and beautiful. Aster is worthy of more attention. My patrons should give it a trial.

Mr. Park: I got a packet of Silver Cloud Aster seeds in the spring. The flowers were very large and extra fine. They were admired by every one. The plant blossomed freely and continuously till after the frost.—Mrs. Feller, Jackson Co., Mich., Nov. 1903.

Bartonia aurea, 2 ft. high, showy yellow flowers 5

New Jewel Aster.

Special mixture, 4 phts. 10 cts., 1 pht. 3 cts. Grows two feet high, with large, full-double flowers, globular in form and freely borne. A superb sort for garden or pot culture. Always greatly admired.

### Miscellaneous Asters.

Victoria Needle, fine mixed. Mr. Park: I like your seeds. I have acted as agent for other firms, but when I want for my own use I send to you. I think your seeds always produce such fine specimens. Last spring I sent to a noted firm for Ostrich Plume Aster, also to you for the same. The plants I got from your seeds were much nicer, and the flower larger and more fleecy-looking.—Mr. J. N. Fairbank, Hillsdale Co. Mich., Oct. 9, 1905.

# Park's Fine Double Balsam.

Special Mixture, 4 pkts. 10 cts. . pkt. 8 cts.

The Improved Double Balsam ranks among our best annuals. Any one can grow the plants from seeds, and they thrive in any garden soil. The plants are bushy, and become a dense mass of rich foliage and exquisite, waxy double flowers in the most charming and attractive colors. The plants are ever-blooming and the flowers are showy on the plant, and when removed make lovely plate bouquets. Started in early September and potted they bloom well in the window in winter. The finest of all Double Balsams is Park's Prize Camellia-flowered.

Plants of this splendid variety grow from two to three feet high, and show great wreaths of immense flowers as double as a Hermosa rose, and in all the most placeing color

mer ours among brounding coto.	TO AD TOTTO MOS
Pure white	5 Lilac
Pure scarlet	5 Violet
Crimson	5 Rose spotted.
White reflecting rose	5 Scarlet spotted
Light yellow	5 Violet spotted
Salmon rose	5 White reflecting lilac

Mr. Park: Your Camellia-flowered Balsams were exceedingly fine, and took first premium at the fair. The flowers were very large and perfectly double. The colors ranged from pure white through several shades of pink to deep crimson. A pure glisten-ing pink was especially admired.—Mrs. Cole, Ottawa Co., Mich.

Mr. Park: In April I bought a packet of your Prize Camellia-flowerered Balsam, mixed colors. I planted them out in a bed in the yard, and such flowers as they produced I never saw before. Everybody admired them.—Mrs. H. D. Cunch, Putnam Co., Mo., Oct. 10, 1905.

Mr. Park: I had the finest and handsomest Balsams, from your seeds, that I ever raised. I am a great lover of flowers and wish everyone would try your Double Balsams.—Mrs. Daisy Fuller, Fairfield Co. Ct., Nov. 7, 1965.

## Other Varieties of Balsams.

Double Dwarf Balsams, effective little plants. Twelve varieties of plain and six of spotted, each.

Dwarfs in special mixture, 4 pkts. 10 cts. 1 pkt.

Double Rose-bovered, 12 colors, separate, each.

The varieties mixed, 4 pkts. 10 cts. 1 pkt.

Double Spotted Balsam, 12 colors, separate.

The orte mixed, 4 pkts. 10 cts. 1 pkt.

Victoria, very double, satiny white, dotted scarlet.

Carnation striped, double, mixed, 4 pkts. 10 cts. 1 pkt.

Blood Red, very double and showy.

Solferine, double, white, spotted and striped.

Prince Bismarck, very double, brilliant salmon rose.

Boyal Balsam. The King intense scarlet.

Boyal Balsams, The Queen, bright satin rose.

Balsams, all sorts, mixed, 4 pkts. 10 cts. 1 pkt.

Mr. Park: Those who have never tried your Camellia-flowered Balsan.

Mr. Park: Those who have never tried your Camellia-flowered Balsam as a pot plant have missed a treat. They are beautiful and bloom freely and continuously. M. K. B. Pike Co., Ind., Nov. 4, 1905.

Mr. Park: The grandest of all my flowers was a double white Balsam.
It was carefully pruned to one stock, and all blossoms removed when
faded; it kept shooting up and sending out new buds until late in October. It was magnificent. Mrs. Hattle W. Harris, Darke Co., Ohio.

## Browallia, Large Flowered.

Splendid summer and winter-blooming pot plants of the easiest culture; showy and reliable. The kinds I offer are all large-flowered, but the new so-called Giant Browallia has larger and more attractive flowers than the others.

Large flowered white 5 | New Compact, blue Large flowered purple. 5 | Giant species, blue Special mixture, all sorts, 4 pkts. 10 cts., 1 pkt. 3 cts.

Mr. Park: I planted a packet of your Browallia seeds and the plants bloomed all last winter and even kept up their display throughout the entire summer. The rich blue trumpet-shaped flowers are very beautiful. Mrs. H. E. Lippencott, Burlington Co., N. J., Oct. 3, 1904.

### Daisy (Bellis)

Special Mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

# Calliopsis, New Floriferous.

Special mixture 4 packets 10 cts. 1 packet 3 cts.

For a graceful mass of bright bloom the New Compact Flo-riferous Calliopsis excels. The plants grow a foot high, begin blooming early and continue in bloom the entire season if seeding is prevented. Grouped in a bed, the flowers, borne on fairy stems, are a waving mass of rich color. Sow fall or spring in the bed where the plants are to bloom.

They were of beautiful shades of yellow and red, and so bright they dazled the eye. From this on they are a
must-have with me, and would be with
all flower-lovers if they knew how
bright and pretty they are. Belle Shelton, Wilson Co., Kan, Oct. 16, 1904.
Mr. Park: The Calliopsis raised
from your seeds were just grand, the
flowers being of such beautiful rich
velvety colors. Mrs. M. D., Calaveras,
Co., Cal., Oct. 18, 1904.
Mr. Park: My Calliopsis from your
seeds has been a mass of lovely bloom
all summer. Mrs. Wm. A. Day, Putnam Co., ind., Oct. 12, 1904.
Park's seeds are the best, Park's service prompt. Mrs. N. P. Nelson, Minn.

### Calandrinia in Variety.

Special mixture 4 packets 10 cts. 1 packet 3 bts For a sunny bed in summer the finer varieties of Calandrinia are worthy of more attention. Sown early in Spring in six inch rows and thinned to five inches apart in the in six inch rows and thinned to five inches apart in the rows the plants will soon cover the ground and make a fine display of bloom. They are fleshy and of trailing habit, and the rose, white, crimson and violet flowers are borne profusely for a long time. 4 pkts. 10 cts., 1 pkt. 3 cts.

From the English Flower Garden: Calandrinias have slender stems much branched and prostrate. The flowers are from one to one and a half inches across, and of various colors from white to rose and crimson violet.

They bloom continuously from June till September.

### Calendula Grandiflora.

Special mixture, 4 packets 10 cts., 1 packet 3 cts.

The new large-flowered varieties of Calendula or pot Marigold should have a place in every garden. The plants bloom freely and continuously, and in the autumn, after most of the annuals have succumbed to Jack Frost, a row of these Marigolds in their gorgeous yellow hues is very attractive, rivaling the Autumn Chrysanthemums. Grown in pots they are fine for blooming in a cool window during early winter.

## Callirhoe, trailing hollyhock

Special mixture, 4 packets 10 cts., 1 packet 3 cts. The various species of Callirhoe deserve more attention. The plants are of trailing habit, while the flowers are cup-shaped, bright in color and very showy. Borne freely and continuously they make

in color and very snowy. Borne treety and continuously they hake a fine display in a bed, and are not injured by the hot sun.

Verticilitita, a hardy perennial blooming the first season, flowers rich carmine, produced treely throughout the season.

Lineariloba, white and lilac.

Pedata and Compacia, each.

Special mixture, all varieties, 2 packets 10 cents, 1 packet 3 cents.

# Canna, Gladiolus-flowered.

Finest mixture, 4 pkts 10 cts., 1 pkt 3 cts.

The New Crozy Gladiolusflowered Cannas embrace a wide range of colors and variegations from white through the shades of red to deep crimson, and from cream to golden yellow or orange, many varieties showing hand-somely spotted and blotched flowers. The foliage is beaunowers. The foliage is beau-tiful, being rich green or bronze or variegated, broad and massive, and forming an admirable ground-work for the stately spikes of flaming, Gladiolus-like blooms. The seeds are large, and though somewhat tardy in starting, may be successfully planted by anyone. The plants begin to bloom in three or four months after they appear above ground. The roots are fleshy, and may be kept over winter in a rather dry frost-proof room. The seeds I offer were saved from the best varieties of the originator, Mr. Crozy, and will yield the finest flowers. The named sorts will mostly come true from seeds.

Mr. Park: From a packet of your mixed Gladiolus-flowered Canna seeds I had six different colors, and every one a beauty. I filed the seeds and planted them in the house about the middle of March, and in May set the plants out in the garden, where they have been a delight for several months.—Mrs. Gust Johnson, Saline Co., Kan., Oct. 27, 1905.

Mr. Park: I would advise others to try raising your Gladiolus-flowered Cannas. Mine last year were beautiful. Both foliage and flowers were lovely. I am always pleased with your seeds.—Miss G. Hibbs, Madison Co., Ia.

Mr. Park: What beauties I raised from a three-cent packet of your Crozy's Canna seeds! I cut in the hard shell, then soaked in warm water through the day. They all sprouted. The plants began to bloom in July. One was so pretty, a dark rose, looked like crape, and very large-flowered; only 1½ feet tail. One was yellow spotted red; another plain yellow, but very pretty. I was much pleased with them.—Mrs. N. Perry, Ontagamie Co., Wis.

## Centranthus, New Semi=Dwarf.

Special mixture, 4 pkts 10 cts, 1 pkt 3 cts.

A charming annual rarely met with is Centranthus macrosiphon. It is of the easiest culture from seeds, which may be sown in the garden early, or in the nursery bed to be transplanted. The plants are of dense habit, rather succulent in growth, and bear the delicate little flowers in clusters in great profusion. The new semi-dwarf varieties I offer are especially valuable. They grow a foot high, come into bloom quickly, and make a continuous display throughout the season, until after severe frosts. This lovely annual has not received the attention it merits, and I bespeak for it a trial. It appears well in a hedge or border, and is also desirable as a pot plant. My mixture contains all the colors in good proportion.

Celosia, showy bedding and pot plants, much admired and highly prized; of easy culture. Special mixture of Feathered and Comb sorts, 4 packets 10 cents I packet 3 cents

Chrysanthemum, annual, continuous-blooming, attractive plants for beds or pots flowers large, bright and attractive. Single and double in splendid mixture, 4 pkts 10 cents, 1 packet 3 cents.

Carnation, The Vanguard.

Special mixture, 4 pkts. 10 ets. 1 pkt. 3 ets.

I take great pleasure in offering my patrons a greatly improved Early-flowering Carnation, the plants of which bloom almost as early as those of the earliest Margaret race. The plants of The Vanguard Carnation are dwarf and bushy, stooling out into compact, very floriferous bushes, and are thus especially suited for pots in the window, as well as beds in a sunny place in the garden. The flowers are mostly full double, as shown in the engraving, are of very large size, exhibit a wide range of colors, and many are exquisitely marked and variegated. All are deliciously clove-scented. I feel that too much praise cannot be given this splendid race of Carnations. It certainly represents the most advanced type of beauty yet attained in this popular highly-prized garden and window flower.

A packets Iv cas, 1 packets cts,
Mr. Park: Last spring I purchased
seeds of you of the New Early-flowering Hybrid Carnations. Now I have
twenty-fleve plants, most of which are
budded. Two, a rich, dark red and a
pink and white striped, have bloomed.
Both have the delicious Carnation fragrance. Miss Glenna Musser, Auglane
Co., Ohio, Oct. 11, 1904.

## Centaurea, New Giant.

Special mixture, 4 pkts 10 c., 1 pkt 3 c.

The New Giant Imperial Centaurea, Corn Flower, or Sweet Sultan, is a rare, showy and beautiful annual, the result of a cross of C. Moschata (Sweet Sultan) with C. Margueritæ. The plants start readily from seeds, soon begin to bloom, and attain the height of four feet, bearing very large, handsome, fragrant flowers, as shown in the engraving. This is one of the new annuals deserving general cultivation, and I am glad that I can supply my friends with the seeds in all the fine named varieties. My mixture is well proportioned.

Giant Alba, white..... 5 | Giant Favorite, rose... 5 | Giant Armida, Illac... 5 | Giant Graziosa, purple 5 | Special mixture, all colors, 4 pkts. 10 cts., 1 pkt. 3

Mr. Park: My Centaureas from your seeds were admired by all who saw them. They are easily grown and will well pay for their raising. They bloom until killed by frost, and, as each flower lasts a long time, are excellentfor cutting. Flora M. Booth, Wash. Co., Pa., Oct. 16, 1964.

Mr. Booth, Wash. Co., Pa., Oct. 16, 1994.

Mr. Park: I planted a packet of your Centaurea seeds and I think every seed germinated. I used the plants as a border around a large Canna bed, to which the fine, feathery blooms formed a beautiful contrast. They bloomed all summer, the bed increasing in beauty daily, and is now, Ootober 13 a mass of lovely Carnation-scented flowers. I never saw a flower to keep better when cut, and everyone admires them. I have never had finer flowers than those raised this year from your seeds. Mrs. A. Bunkwitz, St. Clair Co., Ill., Oct. 13, 1904.

# Cosmos, Early Large-flowered.

1 pkt. 3 cts.

Among the most striking and beautiful of annuals, either for the garden bed or for vase flowers for the living room, is the Hybrid Cosmos in its varied colors. Sown where the plants are to stand, when the peach is in bloom, the growth is not re-tarded, and the buds develop earlier. The foliage is feathery and of a rich, green color, while the bright, graceful, long-stemmed flowers, showing in the breeze, have a charming effect; easily grown in any rich, sunny garden spot. The mammoth varieties will grow six to eight feet high and are especially handsome.

Finest mixture. all varieties, 4 pkts. 10 cts., 1 pkt. 3 cts.
Mr. Park: Cosmos is a grand fall flower, a rival of the Dahlia and Chrysanthemum. Each plant will reach a height of from four to six feet, and a more beautiful plant is rarely seen. The pure white, soft pink and deep crimson shades are exquisite, with its dark green, feathery foliage. Every one should grow it. Amanda Gray, Johnson Co., Ill., October 11, 1906.

Mr. Park: The Cosmos were very fine. The colors were white, pink, and a rich velvety red. The flowers are very beautiful for vases, and last a long time after being picked. Bertha M. Knott. Dekalb Co., Ind., Nov. 2, 1905.

Candytuft, Annual.

Special mixture, 4 pkts. 10 cts. 1 pkt. 3 cts. Beautiful, showy, hardy annuals; grow a foot high; sow early where plants are to

bloom; appear best in masses Amara, white, oz. 10c.... 5 | Odorata, sweet, white... 5
Tom Thumb, dwarf... 5 | Rose Cardinal...... 5
Rocket, white... 5 | Carter's Carmine... 5
Lilac... 5 | Dwarf hybrid, mixed... 5
Empress, large white... 5 | Flesh color... 5
Dark Crimaon...... 5 | New Giant Hyacinthflowered, large, white... 5
All sorts, special mixed, oz. 10 cts., 4 pkts. 10c., 1 pkt. 3

### Coxcomb, Celosia.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Curious, showy and beautiful annuals for beds or pots. My strain is very superior.

Cacalia, Flora's I ant Brush; hardy annual; plants a foot high; nowers yellow and scarlet, brush-like, on long, slender stems, mixed..........

Carnation, New Hybrid,
Special mixture, 4 pkts. 10 cts. 1 pkt. 3 cts,
Superb early-flowering pinks, blooming in from
four to six months after sowing. Plants healthy
and hardy, and flowers large, double, scented, of
rich colors, and beautiful.

Capsicum Pepper,
Fine for a hedge or pot culture. I can supply all varieties at 5c. per pkt.; mixed, 4 pkts. 10c. 1 pkt. 3c.

Cynoglossum linifolium, white,fine annual... 5 Cynoglossum cælestinum, blue,fine bee plant 5

# Dahlias, Double and Single.

Special mixture, 4 pkts 10c., 1 pkt 3c.

The Dahlia is one of our most beautiful summer flowers, and is easily and quickly grown from seeds, the plants beginning to bloom early in summer, and continuing till. frost. To have free-blooming Dahlias plant in a sunny bed of gravelly soil, and mulch with stable litter as hot weather approaches. I offer choice imported seeds of the finest quality, and believe they will delight all who try them.

### Choice Double Varieties.

### Choice Single Varieties.

Complete mixture, embracing the above choice Single Dahlias in splendid mixture, 4 pkts 10c, 1 pkt 3

Mr. Park: From the 3-cent packet of mixed Double Dablia seeds I raised as fine Dablias as I ever saw, no two alike, and not a single one in the lot.—Mrs. H. S. McWhorter, Seneca Co., N. Y., Nov. I, 1805.

Mr. Park: I shall never buy Dahlia plants or tu-bers again, when I can get seeds. From the 3-cent packet bought of you last spring I have all colors and kinds, no two allke.—Mrs. J. H. A., Cass Oc., Neb.,

Mr. Park: My Dahlias from your seeds grew fine-ly, and began to bloom before those from tubers. I had both double and single, and such beautiful mark-ings and colors. They are easy to grow from seeds. —Mrs. J. Hagerman, Sag. Co., Mich., Oct. 28, 1905.

## Delphinium=Annual Larkspur. Special mixture, 4 pkts 10 cents, 1 pkt 3 cents.

Improved old-fashioned hardy annual of great beauty, and of easy culture. Sow early, where plants are to bloom.

## Dianthus, Imperial and Japanese Pinks.

Complete mixture, Single and Double, all colors 4 pkts 10c, 1 pkt 3.

These bloom the first season, and are hardy and free-blooming. The flowers are both single and double, are of very rich, attractive colors, and are produced throughout the season. For Diadem Pinks, are especially fine in

Diadem Pink, dark colors, immense double flowers, rich dark variegations... 5
Light colors, like the preceding, but of lighter hues; also New Dwarf, each.... 5
Splendid special mixture of Diadem Pinks, 4 pkts 10 cts., 1 pkt.... 5
Imperial Pinks, d'ble white, white striped, crimson, spotted, red striped, each 5
New Dwarf, double, white, crimson, copper, rose, each..... 5
Imperial Pink in special mixture, all sorts, 4 pkts 10 cts., 1 pkt 3
Indian Pinks, double white, rose, each.... 5
Japan Pinks, Heddewigii, single, white, crimson, blood red, rose, and white

# Dianthus, Large-flowered Double.

Finest mixed, 4 packets 10 cts

The new large-flowered double Japanese Pinks are exceedingly rich and beautiful garden flowers. The seedlings started in spring begin to bloom by mid-summer, and from that time till after severe frosts, the dwarf bushy plants continue to make a fine display of exquisite flowers, double to the centre, of great size, and wonderfully rich in colors and markings. many varieties showing flowers striped, spotted, ringed and mar-gined in the most picturesque and attractive manner. The colors range from fine white to dark velvety crimson, including salmon and rose shades, heretofore unknown in this class of Pinks. For a bed in a sunny place these splendid Pinks are hardly surpassed. Their culture is easy, and the plants never fail to grow and bloom with great freedom, and call forth ardent expressions of admiration from all who see them in bloom. Showy in the garden, they are also prized for bouquets or for vases for table decoration. I offer these Pinks only in mixture, but the seeds are firstclass, and will not only yield the finest double flowers, but show a wide range of new and novel colors and variegations. Price, finest mixed, 4 pkts. 10 cts., 1 pkt. 3 cts.

mixed, 4 pkts. 10 cts., 1 pkt. 3 cts.

Mr. Park: My Japanese Pinks from your
seeds gave unbounded satisfaction. They
began to bloom in July and are now covered
with beantiful flowers, no two alike, and all
so lovely there is no choice between them.
A. E. W. Manistee Co., Mich., Oct. 7, '04.

Mr. Park: From a packet of your Dianthus,
seeds I raised thirty or more fine plants. The
blossoms are of all shades of red and pink,
white, cream, blotched, striped and spotted,
and the double flowers were as large as
Zinnias. They were a mass of beautiful
bloom all summer, and are so easy to raise
that I shall never be without them again.
Mrs. Susie Holden, Greene Co., Ind., Oct. 5,
1504.

Mr. Park: From one three-cent packet of your Dianthus seeds we had a large bed of fine plants that bloomed all summer. There were dowers of almost every color, and they were simply beautiful. I would advise the sisters to try them. Jessie Sharp, Adams Co., Ohio, Oct. 4, 1904.

Mr. Park: I bought a three-cent packet of Dianthus seeds from you last spring, and they came up nicely and the plants grew rapidly. They were soon in bloom and their beauty was indescribable—so many lovely colors and markings. We counted twenty-four differently colored flowers in the bed. It is the 8th of October and we have had several hard frosts, but the bed is still covered with flowers and new buds are forming and opening daily. I keep the seed pods picked off. Mary J. Baumgartner, Lehigh Co., Pa., Oct. 8, 1904,

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Here is a race of Perennial Delphinium or Larkspur, compact in habit and bearing large, handsome flowers in profusion the first season. It is especially useful for beds and borders, and the flowers are fine for cutting, the colors being rich blue, azure blue and pure white. The plants, fairly represented in the engraving, are hardy, and bloom for several years. Cut the flowers freely to prevent seeding, which exhausts the plants and weakens their vital-ity. This is one of our finest garden flowers, as delicate as an Orchid, showy and generally satisfactory.

# Erysimum, New Bedding. Price, 4 pkts. 10 cts., 1 pkt. 3 cts. I offer seeds of the New Compact Bedding

Erysimum. Sown in spring or early summer the plants will show a wealth of rich golden bloom in the autumn, will endure the winter, and bloom again freely the next season. The plants grow ten inches high, are of dense, bushy habit, and each branch is terminated by a large cymous cluster of rich orange, Wallflower-like flowers, dazzling the eye with its golden display, flowers, dazzling the eye with its golden display, and filling the surrounding air with delicious perfume. The seeds may be sown also in the fall for spring and summer blooming the next year. It is a near relative of the Wallflower, and will please all who find the Wallflower a favorite. Its culture is very simple. The seeds are sown in rows eight inches apart, and the plants thinned till they stand six inches apart in the row. See engraving. the row. See engraving.

Note—Erysimum, New Bedding, is a charming early-flow-ering biennial, indispensible for spring bedding, literally covered with golden yellow flowers. Sown early in the year, bushy little plants bloom in the succeeding autumn, and again burst into full beauty in early spring.—English Notes.

I can also supply seeds of Erysimum Perofskianum and Erysimum Pulchellum. Price 5 cents per packet. The New Erysimum, however, is the best.

## Double mixed, 4 packets 10 cents. 1 packet.....

## Eschscholtzia in Variety.

Special mixture, double and single, 4 pkts. 10c.. 1 pkt. 3c. This is the State flower of the Golden State, California, chosen because a species with rich, golden flowers appears in great patches upon the landscape. The plants grow a foot high, are dense and silvery, the foliage being deeply cut. The large, cuplike flowers are born above the foliage on long stems. The florist has developed many long stems. The norst has developed hard colors, and also double flowers, and as a border or low hedge the plants are very effective. Sow where you wish the plants to bloom, and thin to six inches apart. See

Mr. Park: For show and bloom all summer long, rain or shine, plant Eschscholtzias. They hold up their yellow faces to the sun as if to say "we love you." Plant where they are to stand. I planted a row on the garden walk, and we had hundreds of blooms all summer. Dessa Berry, Wise C, Tex., Oct. 6, 1905.

illustration.

## Godetia in Variety.

Special mixture, 4 parkets 10 cents, 1 packet 3 cents.

Beautiful annuals. The flowers large, shades from white to crimson, many blotched. Plants grow a foot high, and in a sandy soil bloom profusely. Special mixture, 4 packets 10 cents, 1 packet 3 cents. See illustration.

Mr. Park: My Godetias were extra fine. They were in a large, shady bed of rich soil, and my two little boys had some in a shaded bed of poorer soil. Theirs were richer-colored, and fully as large as mine. Every seed grew, I think. They are just the flowers for either sun or shade. Every one admired them. Mrs. M. E. Titus, Whatcom Co., Wash., Oct., 1905.

Fenzlia dianthiftora, a profuse-blooming an-nual with rose, white and pink flowers, mixed.... 5 Fever fere, grows 11/2 feet high, with double white flowers in profusion.....

Gamolepis. Tagetes, a vellow-flowered annual, 5 Grammanthes gentianoides, a very dwarf annual; flowers yellow, marked red.....

Guara Lindheimeri, a tall annual, with long spikes of pretty white bloom. Glaucium corniculatum. a graceful, silver-foliaged annual, with red bloom.....

Gerardia hybrida, a Pentstemon-like perennial blooming the first year.

# Gaillardia, Single and Double.

Special mixture, all varieties, 4 pkts. 10 cts., 1 pkt. 3 cts.

Gaillardia picta is an annual, bearing Gallardia picta is an annual, pearing showy, single, red and yellow flowers, and G. Lorenziana is a variety with double flowers. G. grandiflora is a perennial, but blooms the first season. All are beautiful, easily grown and showy. In beds in a sunny place where the soil is not too rich the plants grow a foot high, and set ten inches apart show a waving mass of brilliant flowers on long stems. The seeds may be sown where the plants are to bloom, or may be transplanted.

Picta, single, white, white margined, rose and white, yellow, yellow banded, salmon, and quilled, Fig. 1, each

Lorenziana, double. yellow, sulphur, red and yellow, Fig. 2, each.

Grandiflora, New Compact. This is a variety of dwarf growth, compact and free-blooming. Mixed, 4 packets 10 cents, 1 packet...... Gaillardias in special mixture, 4 pkts 10c, 1 pkt 3

Park: Surely the Gaillardia gives as satisfactory results as any flower that grows. It begins blooming and if out freely will bloom until after late frosts. Showy in single specimens, and challenges our admiraearly, and if cut freely will bloom until after late frosts. Show the tion when prouped in masses.—Ida A. Cope, Santa Clara, Cal.

## Gilias in Variety.

Complete mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

The Gilias are graceful and beautiful border and edging plants of easy culture. The flowers are in clusters, are mostly white and shades of red and blue, though some show yellow variegations. Sow the seeds either in spring or fall, where the plants are to bloom. They bloom freely and continually until after severe frosts.

the very best for edgings ... Complete mixture of the above sorts, 4 packets 10 cents, 1 packet. ...

Mr. Park: My Gilias from your seeds were very beautiful -they had such fine foliage, and such modest little flowers. Those in partial shade were the finest.—Mrs. Wilson, Garfield Co., Okl., Oct. 30, 1905.

Bismarckianus, grows six feet tall, and bears huge

flowers
Californicus, fl. pl., large double flowers.
Globosus Fistulosa, fl. pl., 5 feet high; very large,
full-double flowers; one of the best...
Goldleaf, seven feet bigh; leaves blotched with gold

## Helianthus=Sunflower.

Complete mixture, 4 pkts. 10c., 1 pkt. 3c.

The Sunflowers are large, coarse plants, and some varieties bear enormous flowers. They are, therefore, among the most showy of garden flowers, and appear well in groups or borders in the background also as hedges or screens. Their free culture is said to promote the health of a miasmatic place, while their large, cheerful flowers, facing the sun, dispel the gloom and are a happy attraction. The new varieties of H. Cucumerifolius are free-blooming garden plants, and the blooms are fine for corsage flowers. All are of easy culture, and can be sown as soon as the ground can be worked in spring.

Primrose-colored, 6 feet high; creamy yellow flowers 5 Cucumerifolius, small single flower; bushy plant 4

Diadem, like Stella, but with light citron petals

# Hebenstreitia Comosa.

Price, 4 pkts. 10 cts, 1 pkt. 3 cts.

From South Africa we have a novelty under the above name, which might be properly termed "African Mignonette." The plant grows eighteen inches high, The plant grows eighteen inches high, and produces numerous spikes of curiously formed flowers, as shown in the engraving, the ground color white, upon which is laid blotches of bright orange scarlet. The spikes of bloom are exquisitely scented, and excellent for use in bouquets. The plant is successfully treated as a half-hardy annual, and the sceds may be sown in a shelter. and the seeds may be sown in a shelterand the seeds may be sown in a sheller-ed garden bed when the apple is in bloom. As yet the seeds are mostly sold in this country at 25 cents per packet, but, I have been able to secure a lot of choice seeds which I offer at a popular price, four packets 10 cents, one packet 3 cents. The plant is worthy of a trial.

of a trial.

A Rare Sweet-scented Annual—A rare annual flower has come to light, which, if we mistake not, will be sought after in the future. It bears the terrible name of Hebenstreitia Comosa. It is pretty in the daytime, but on a warm summer evening a nutty scent floats over the garden. It comes from the Hebenstreitia, and many will agree with the writer that a mingling of perfumes distilled from Mignonette, Rose and Virginian Stock, and such a fragant flower as the Hebenstreitia gives a new joy to the garden when the flowers are in darkness. A whiff of Hebenstreitia perfume is delicious. The flowers are on a slender spike, and have just the dull shade of white that even the best Mignonettes possess. The seeds may be sown outdoors in April.—Viator in the Garden.

## Hibiscus, Park's Giant Primrose.

4 pkts. 10 cts., 1 pkt. 8 cts.

An easily grown and very beautiful and showy flower is the New Giant Primrose Hibiscus. Started early the plants will bloom well the first season, and if kept over and planted out the second season, will form elegant, branching trees ten or twelve branching trees, ten or twelve feet high, every branch sway-ing lovely Primrose-yellow flowers of enormous size, opening fresh every day through-out the season. Patrons who have tried the grand flower report their success and pleasura with it in the highest terms, and I believe it will delight all who try it.

delight all who try it.

Mr. Park: This year seeds of Park's Primrose Hibiscus were sown in the open ground in only moderately rich soil, but the plants grew over six feet high. One blossom measured over eight inches in diameter. The flowers are a clear sulphur yellow, with a rich dark center.—L. J., Crawford Co., Ill., Nov. 8, 1905.

Mr. Park: I raised two Primrose Hibiscus from a 3-cent packet of your seeds, started in a window box early in spring. One is seven feet high, the other taller, and the beautiful yellow flowers are charming, as large as saucers, and of the most lovely chade of yellow I have ever seen, like a Hollyhock, but much more beautiful and graceful. I advise all to try it.—Lillie R. Billings, Kansas Oity, Kans., Oct. 12, 1905.

# Kochia:Belvidere Cypress.

4 packets 10 cents, 1 packet 8 cents.

This is an old but rare This is an old but fare foliage plant, easily and quickly grown from seed. As a pot plant, or for a low screen or foliage border it is very desirable. The dense and feathery foliage is useful for your out-plant stable decorption. ful for room or table decoration, when cut, or if grown in pots the plants can be used from time to time for that purpose, as desired. When well grown the plants rival the choice kinds of Asparagus while they are easier grown.

Mr. Park: I do not often see that interesting little plant Kochia. I took first premium at our Fall Fair for collection of Foliage plants, of which one was a beautiful specimen of Kochia, it is now a bright crimson, and much admired.—Mrs. F. C. Jones, Ont., Can., Oct. 28, 1905.

Can, Oct. 28, 1905.

Note.—Few more charming plants have been added to the gardens of recent years than the half-hardy foliage annual which bears the above name of Kochia Scoparta. It is, indeed, a remarkable plant, and is as easy to grow as the commonest of annuals. All that is needed is the same treatment as an Aster, and if planted out at the end of May, it will grow to feet higher and present throughout the summer a mass of graceful greenery; nor is the summer beauty of the Kochia Scoparia ist only feature, because in the autumn the foliage assumes a pleasing shade of crimson. Last year I tried the experiment of lifting and potting plants with great success, as for weeks they were highly effective in a conservatory. A first class certificate was given to Kochia Scoparia when it was a to highly effective in a conservatory. A first class certificate was given to Kochia Scoparia when it was exhibited before the Royal Horticultural Society, and it was richly deserving, as this is a plant no garden should be without.—G. H. H., in the English Garden, May 9, 1903.

## Lavatera Trimestris.

Special mixture, 4 pkts. 10 cts., 1 pkt, 3 cts. These are beautiful showy annuals, not unlike dwarf Hollyhocks. Plants grow three feet high, branch freely, and bloom all summer. They are fine for hedges, or beds, and of the easiest culture. See eng.

Deds, and of the easiest culture. See eng.

Humenannia, Mexican Poppy, a fine annual

Impatiens glanduigera. Giant Balsam;
six feet high, crowned with clusters of showy
red and white flowers; mixed, 4 pkts.10 cts., 1 pkt.

Bultzni. Zauzhar Balsam; easily grown from
seed; ever-blooming;mixed, 4 pkts.10 cts., 1 pkt.

Jonopsidium acaule, charming miniature for
a carpet about pot-plants, or for edging; known
as Dismond Flower; 4 pkts.10 cts., 1 pkt.

Maulfussia amelloides, a pretty annual, six
inches high; Daisy-like; many sorts mixed....

Kenilworth Lvy, a splendid basket plant, mx'd

Lugia elegans, fine annual for beds and cutting;
Leptosyphon, very free-flowering, beautiful
dwarf annuals; many varieties, mixed......

Linaria, fine plants for beds and pots; many
storts, mixed......

Lupinus, showy, plants of easy culture; often 3

sorts, mixed.

Lupinus, showy, plants of easy culture; often 3 feet high; many sorts mixed.

Lychnis, scarlet, rose or white flowers in profusion; fine mixed; all sorts; 4 pkts 10 cts., 1 pkt.

Linum grandiflorum, scarlet flowers, a fine annual, a foot high.

# Lobelia, Annual Varieties.

Complete mixture of all varieties and colors, 4 pkts. 10 cts., 1 pkt. 3 cts.

These are very graceful and beautiful flowering plants for out-door edgings and for indoor pots and baskets. Seedling plants begin to bloom in a few weeks after they are started, and bloom freely and continuously for several months, until exhausted. The flowers are of various shades of white, red and blue, often with a conspicuous eye, as shown in the engraving, and alway bright, delicate and attractive. Started in mid-summer the plants are hand-some for pots and baskets in winter, and in the sunny window of a cool room will bloom in the spring.

DIOOM IN the Spring,
Barnard's Perpetual, a very fine
variety, compact in habit, and
in bloom through the season;
flowers dark blue with a distinct white eye. Fine for pots,
and beds, 4 pkts. 10 cts., 1 pkt...
White Lady, large flowered white
Pumils abla, dwarf compact, white
Pumils aplendens, dark blue, with
white eye compact.

Mr. Park: From a packet of your Lobelia seeds I have myriads of delicate little flowers of heaven's own blue. A stray hanging over the window box on the porch calls forth many exclamations of praise and delight.—Miss Belle Fenque, Avoyelles Parish, La., Oct. 17, 1905.

Mr. Park: Tell your patrons if they want a pretty edging to try Lobelta. Of your mixed 3-cent packet I think each seed brought 2 plants. And such a mass of thy blooms as they were. From a distance they looked like a blue ribbon.—Mrs. J. W. A., Cass Co., Neb., Oct. 12, 1905.

Mr. Park: I am delighted with the three-cent packet of Lobelia seeds I received from you last spring. T plants are faultless. They are now in bloom and are perfect little beauties.—Mrs. A. E. D., Cocks Co., Texas.

# Marigold in Variety.

Complete mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

The Marigolds (Tagetes,) are old-fashioned flowers, but are not to be despised. There are few flowers brighter or more attractive. Even a child can start the plants, and they quickly come to bloom, and are a snow of brown or golden flowers throughout the entire season, until after severe frost. Every garden should contain a bed of these flowers The Double African kinds are as showy as Dahlias, and more free-blooming. The French Marigolds are not so large, but are more delicate, and quite as attractive. The single bicolored dwarf varieties are now

fashionable, and are fine for edging and borders. A bed of Marigolds is very attractive

French Dwarf Single, (see engrav-ing, Legion of Honor, gold margin, yellow, sulphur and striped, each....... French Dwarf, Single mixed 4 packets 10 cents, 1 packet.....

10 cents, 1 packet.

Tagetes signata pumila, beautiful
edging, nine inches high, dense, fernileafed, and smothered with golden
flowers, 4 packets 10 cents, 1 packet.

Complete mixture, French, African,
Single and Signata, carefully proportioned, containing seeds of all the
sorts, price 4 packets 10 cents, 1
packet.

FRENCH MARIGOLD.

Mr. Park: Our African Marigolds are still bright and cheerful. No other flowers will stand as much abuse and neglect, and still bloom and brighten.—Josephine O'Mealey, Lucas County, Ohio. November 25, 1903.

packet.

# Mignonette, Sweet, in Variety.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

The Sweet Mignonette is a favorite on account of the delicious fragrance of its flowers, which are produced in large spikes, all the season The seeds start quickly and the plants soon come into bloom. The new varieties I offer bear various colored flowers, the spikes are very large, and the plants compact. They will be found much finer than the old-fashioned sorts. In some places acres of Mignonette are sown for bee pasturage, for which purpose the flowers are hardly excelled. For field culture I can supply seeds at \$1.00 per pound, or 8 cents an ounce, postpaid.

7 8 8	
Grandifiora improved, large flowered	3
Bismarck, new, improved Machet	3
Gabriele, robust, large spikes of flowers	
Gigantea pyramidalis, splendid large-flowered	
Miles Spiral, splendid sort 3	3
Machet, thick spikes of reddish flowers; excellent for pots	
Ruby Machet, coppery scarlet flowers 5	5
Pumila erecta, dwarf compact, fine for pots	
Victoria red, dark red, fine 3	3
Common Sweet \$.100 per pound, 8 cents an ounce	
Special mixture of all the above sorts, 4 pkts 10 cts., 1 pkt	3

Mr. Park; My Mignonette from your seeds is exceptionally pretty with its dark green foliage topped with clusters of bright red blooms, and its delicious fragrance prevades the whole garden. It is in full bloom now, and I appreciate it so much.—Mrs. Ethel Kirby, Jasper Co., Mo., Oct. 1, 1904.

## Matricaria==Golden Feather.

Special mixture, 4 pkts., 10 cts., 1 pkt. 3 cts.

I offer two beautiful varieties of Matrica-ria or Golden Feather, one

bearing white flowers and the other golden ones. The plants have lovely foliage, which shows nicely early in the season, but later the double flowers are borne in such profusion that a plant appears as a globe of bloom, the foliage being hidden almost entirely by the flowers. Fine for borders, edgings or beds. Give the plants a rich soil and suppry situation. sunny situation,

## Mimulus=Monkey Flower.

Special mixture, all sorts, 4 packets 10 cents, 1 packet 3 cents.

Pretty plants for pots or baskets; plants grow six to eight inches high, and are covered with showy flowers, many spotted and blotched. They like sandy, moist soil and partial shade.

OTHER FINE KINDS OF MIMULUS. 

Malope Grandiflors, hardy annuals, one foot high; showy, cupped flowers, white, purple and rose	
Mauritiana, rose, veined	3

Complete mixture, an sures, a pais. 10 cts., 1 pais	ž

Martynia fragrans, red with yellow throat; Lutea, orange-yellow; Proboscidea, lilac; each... All varieties in special mixture, 4 packets 10 cents,

one packet...

Mesembryanthemum, Ice Plant, Dew Plant, and Tricolor. separate or mixed...

Mimosa pudica, Sensitive Plant.......

Molucella spinosa, large, curious calyx......

# Myosotis, Forget=me=not.

Special mx't, 4 pkts. 10 cts., 1 pkt. 3 cts.

The Forget-me-not is a charming little flower, modest, delicate, exqusite in color, graceful and fragrant. No intelligent person can help admiring it. With some its admiration is almost a passion. Lately it has been greatly improved, and the plants now grow so compactly and bloom so freely that they appear as a globe of soft, rich color. Started in spring the plants bloom in autumn; started in August, they bloom early the next season. They like a moist, rather shady situation.

ing; blue; see engraving ...

Myosotis, Forget-me-not, in complete special mixture, all varieties, 4 pkts. 10 cts., 1 pkt.

Mr. Park: My hanging basket of Myosotis from your seeds thrives wonderfully, and is so full of bloom it reables a patch of blue sky.—G. C. Jayeox, Lorain Co., Ohio, Oct. 10, 1904.

## Mirabilis, Four-O-Clock.

Special mixture, 4 pkts. 10c., 1 pkt. 3c.

An old but favorite annual. Plants grow to dense, globular bushes a foot to three feet high, and are covered every evening 

Complete mixture, tall and dwarf, in all colors, 4 packets 10 cents. 1 packet 3 cents. Mr. Park: The Mirabilis seeds received from you last spring produced fine, thrifty plants. The blossoms were of a great variety of colors, including red, red and white, pink, pink and white and purpls. They made a very showy and handsome bed.—Hazel Benson, Polk Co., Mo., Oct. 4, 1904.

### Nemesia, New Hybrids. Special mixture, 4 pkts. 10 cts., 1 pkt. 3.

The Nemesia Hybrids are beautiful annuals, excellent as pot plants, and showy in the garden. The plants grow a foot high, are of dense, compact habit, and bloom very freely throughout the season. The hybrids of N. Strumosa, a new species from South Africa, are especially handsome, and greatly admired in Europe.

NOTE .-- Nemesia Strumosa bears flowers of various shades from white to crimson, and seedlings started in

NOTE.—Nemesia Strumosa bears flowers of various shades from white to crimson, and seedlings started in March begin to bloom in June and continue until late in the autumn. Bed out in May.—Book of Gardening.

Mr. Park: I must speak a good word for the packet of Nemesia Strumosa seeds I got from you. I sowed them in March and I believe every seed grow. I gave away a great many plants and still had a generous supply for myself. In April I transplanted them into the garden, and they commenced blooming in June and continued in blossom until late in October. They were as handsome as Phlox Drummondii, and were greatly admired by all who saw them.—Mrs. Wilson, Garfield Co., Okla., Nov. 1 1904.

# Nicotiana, Ornamental.

Valuable plants for foliage and flowers. Some make grand beds upon the lawn, both foliage and flowers being attractive. All are of easy culture. Give the plants rich,

moist soil, warm, sunny exposure.

Atropurpurea grandiflora, very large, semi-tropical leaves, and clusters of rosy flowers; six feet high and rather coarse, but useful for a clump in the back-ground.....

Colossea, very showy as a semi-tropical garden plant; five feet high with

Macrophylla gigantea, six feet high, bearing enormous leaves and trusses of tubular flowers; appears well in the back-ground, or among shrubbery 5 Tobacum fol. variegatts, a small per centage bears foliage blotched with

white; very handsome.

Affluis, white, blooming freely in the evening throughout the summer; delightfully fragrant; blooms well in the winter when cut back and potted early in autumn; 4 packets 10 cents, one packet.

Sylvestris, tall-growing, with fragrant, drooping flowers that remain open throughout the day; 4 packets 10 cents, 1 packet.

Acutifolia, white, fragrant.

NICOTIANA AFFINIS

### Nasturtium===Tom Thumb.

Dwarf Nasturtlum, special mixture, 4 packets 10 cents, 1 packet 3 cents.

These are bright, beautiful and very fragrant annual flowers, desirable either for beds or pots. Anyone can grow the plants from seeds, and they thrive in any soil or situation. They grow a foot high; and are a mass of splendid flowers throughout the summer and autumn, especially when kept from seeding. White, scarlet, crimson, yellow and spotted are the best for bedding, and I can supply these separately for that purpose at 15 cts. an onnce.

Nycterinia, Fragrant.

NASTURTIUM-TOM THUMB.

# Pansy, Roemer's Giant Prize.

Complete special mixture, 4 packets 10 cents, 1 packet 3 cents.

Doubtless the most popular herbaceous perennial flower in cultivation is the Pansy, and it deserves all the praise it receives. From earliest spring until the snows of winter appear it delights us with its large, bright, delicate-textured, fragrant flowers in all the shades of the rainbow, and in the most striking and beautiful variegations as well as self colors. The popularity of the Pansy has led many florists to give it special attention, and this competition has wonderfully improved it, so that the flowers of to-day far surpass in this competition has wonderfully improved it, so that the flowers of to-day far surpass in size and gorgeous coloring these of a decade ago. After a trial of the high-class strains I have decided that there is nothing in Pansies that can surpass Rœmer's Giant Prize varieties. Mr. Rœmer is a German who gives his great speciality, the Pansy, his best thought and care, and those who plant his seeds can depend upon getting something extra. I have pleasure in offering my friends seeds direct from his hand. Pansy seeds start in from ten to fifteen days, and plants begin to bloom in a few weeks. If not exhausted the first year, they will bloom the second and often the third season. The plants like a partial shade and moist but well-drained soil. Plants started in mid-summer make a spring hed that rivals the Dutch bulbs in their gorgeous hearty. I offer Ræmer's seeds a spring bed that rivals the Dutch bulbs in their gorgeous beauty. I offer Remer's seeds in mixed shades, but can supply almost any variety in cultivation, especially the choice new ones. The diversity is so great in Pansies that I believe the mixture of shades preferable in buying, and I therefore confidently recommend them.

\$3-25 cts. for 10 pkts. of Ræmer's Giant Prize Pansies—1 pkt. each of the following.

Blotched and Spotted, embracing pure ground colors, with blotches and spots showing in peculiar and striking contrast; marvelous in size, form and odd markings; 4 pkts. 10 cts., 1 pkt. ... 3 Shaded and Margined, embracing all of the leading colors, margined and shaded and rayed in superb and charming contrast; many light and beautiful tints as well as deeper and richer shades; 4 pkts. 10 cts., 1 pkt. ... ... 3 Accure in variety, embracing lovely new shades of light blue, azure, ultramarine and lavender blue, some strikingly marked and tinted; 4 pkts. 10 cts., 1 pkt. ... ... ... ... Miccel color, embracing a variety of superb shades and markings not included in above offerings, as plain and fancy faces of orange, bronze, peacock lilac, violet, etc.: many rare varieties mixed, 4 pkts. 10 cts., 1 pkt. ... ... ... 3 efully prepared, 4 pkts. 10 cts., 1 pkt. ... ... ... ... ... ... 3

Mr. Park: Your Romers's Giant Pansies were just grand. The colors were variegated, red, yellow, white and purple, and I never found, anything equal to them in size.—A. Taylor, Burl. Co., N. J., Sept. 30, 1905.

Superb Named Giant Pansies, Each, per Packet 5 Cents, or in Complete Mix-

Adonis, Royal Purple, Bright Golden Yellow, Bronze Shades, Black Blue, Emp. William, Fire King, Golden Queen, King of Blacks, Light Blue, Lord Beaconsfield, Pres. McKinley, Canary Bird, Prince Bismarck, Quadricolor, Rosy Likac, Snow Queen, Striped Perfection, Violet Blue, Cannidissima, Golden Gem, Marbled Yellow, White with eye, Yellow with eye, Ruby Red, Cassier's Giant, Hortense Rose, Giant Spotted, Masterpiece, Freya, Snowflake, Peacock, Emperor Frederick, Fairy Queen, Mourning Bride, Pres. Enothera, Evening Primrose; large yellow, white and rose flower opening in the evening. Acaulis, Lamarckiana, Macrantha, Fraseri, Johnsont, etc., separate. Special mixture, of all sorts, 4 pkts. 10 cents, 1 pkt. 3

# Papaver, Annual Poppies.

Complete special mixture, 4 packets 10 cents, 1 packet 3 cents,

PARE'S DOUBLE-PLOWERED GLANT POPPT.

The poppy is an old garden flower, but it still retains its place as a useful, showy and beautiful annual. The flowers are always bright and attractive, and a bed of the plants is gorgeous. Few hardy an-nuals are of easier culture, and few, if any, make a finer garden display. Sow the seeds in autumn, or early in spring, where the plants are to bloom, and thin out until they stand six inches apart. The newer varieties are grand, and never fail to please. By all means sow a bed of the im-proved Poppies. You will never regret it. PARK'S DOUBLE-FLOWERED GIANT POPPIES. (See eng.)

This is a vigorous race of Popples growing from 2½ to 3 feet high. The foliage is massive, beautifully crimped, and of a lovely silver-green color. The flowers are perfectly double, of immense size, and produced on long, strong stems. The plants are admirable as single specimens, and grand when massed in a bed. I offer the following splendid colors:

White Feathered 5
White striped scarlet 5
White and purple 5
Light yellow 5
Red, striped white 5
Compater, white ground 5
Pomegranate on white 5 .... ...... 6 Bright rose \_\_\_\_ 5 | Purple \_\_\_\_ 5
Special mixture of the above sorts, 4 pkts. 70c., 1 pkts. 3

### CARDINAL POPPY NEW HYBRIDS.

Plants 18 inches high, with deep-cut, dark green foliage and very large double flowers; in bloom a long time; very brilliant and effective. I have these colors

 Cardinal red......

 5

Brick red...... White (May Campbell) 5 Special mixture 4 pkts. 5 10 cts., 1 pkt ...... - 3

### AMBREAL LIST OF CHOICE ANNUAL POPPIES.

Mr. Park: Last spring I planted your Ranunculus Poppies in a rich bed beside the north fence, where the sun shone all day long. They came up well, and were beautiful. I never saw such Poppies—white, red, dark purple and striped, with all the intermediate shades, and all as double as a rose. Mrs. B. P. Buck, Lesueur Co., Minn., Oct. 18, 1906.

## Pentstemon, Gloxinia=flowed.

Special mixture, 4 packets 10 cents., 1 packet 3 cents.

The new Hybrid Pentstemons have large, showy, Gloxinia-like flowers of all shades, from rose to scarlet, from white to rose and lilac, and from lavender to blue and violet. Plants grow two to three feet high and bloom throughout the autumn. Give them a sunny bed.

Dark Red and Scarlet shades mixed...... 5 | Blue and Violet shades, mixed ...... 5 | Complete mixture, 4 pkts. 10 ots., 1 pkt. 3

Mr. Park: How I wish all flower-lovers could have seen my bed of Gloxinia-flowered Penstemons raised from a 3-cent packet of your seeds. I had eleven plants—all different colors. Some were striped and spotted, and a white with rose-colored eleve was a beauty. I sowed the seeds in a box, set the plants out the last of May, and they began to bloom in August. They were greatly admired, and I want a large bed next year. Mrs. N. Perry, Outagamie Oo., Wis., Oct. 7, 1904.

# Petunia, Single and Double.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

THE Petunia is certainly without a rival for general cultivation. The various classes are adapted for beds, for show flowers or for edgings and pots, their culture being of the most simple character, and their free and continuous blooming quality recommending them to all who grow flowers. My strain of Ruffled Giants cannot be surpassed. My seeds of these, both single and double, were saved from carefully hybridized flowers, The Bedding and Edging Petunias have no equal as bedding plants. They make a magnificent display the whole season, far outrivaling the older sorts.

### Large-flowered Single and Double Petunias (Ruffled Giants). Special mixture, 4 packets 10 cents, 1 packet 3 cents.

Single Petunia, Plain.	Single Petunia, Fringed.	Double Petunias.
Pure white, very large 5	Fimbriata alba, white	White 5

4 PKIS. 19 Cie., I PKL	10 cents, 1 pkt 3	ture, 4 pkts. 10 cts , 1 pkt 3

Ms-Park: The large-flowering Petunias, (single), were beautiful. There were several colors and all were usually large and finely shaped. They are covered with bloom now, and I shall keep them in the window for winter. I had good success with all the seeds ordered, but those mentioned were unusually fine. Berths Knott, Dehalb Co., Ind., Nov. 2, 1905.

### Park's Hybrid Bedding Petunias. Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

These are exceedingly free-blooming. The plants branch and these are exceedingly free-blooming. The plants branch and soon cover the bed with rich, fragrant flowers, continuing so throughout the season, if not exhausted seeding. The flowers are not large, but show great diversity in colors, and elegant contrast in variegation. They are among the most useful and beautiful of our bedding annuals.

had enough for a large bed, and it was a great success. I never saw so many different shades and markings in Petunias. I had pinched off the tops of some of them, and have rooted them in water for the house. One, I especially admired, was a color I never saw in Petunias before, a dark, velvety marcon, shaded black, very odd and beautiful. Mrs. G. F. Clark, York Co., Me., Oct. 9, 1905.

Mr. Park: I sent last spring and got a three-cent packet of Petunias. They were "Ruffled Giants", sure enough. They were great beauties. All who love flowers should try them. Mrs. Vena B. Heffner, Braxton Co., W. Va., Oct. 26, 1905.

## The New and Beautiful Dwarf Edging Petunias.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

# Phlox Drummondii, Improved.

Complete special mixture, 4 packets 10 cents, 1 packet 3 cents.

One of the most desirable of annual flowers is the Phlox Drummondii. Seedling plants begin to bloom in a few weeks after starting, and continue to increase in size and plants begin to bloom in a rew weeks after starting, and continue to increase in size and floriferousness until cut down by the severe frosts of winter. The flowers are in large clusters, are bright and varied in color, and exceedingly showy, while their fragrance scents the entire garden during the summer evenings. As bedding plants, as well as for pots and edging, the various races of Phlox Drummondii deserve a prominent place. The great improvements in form and color recently brought about by enthusiastic florists. make the varieties now offered far superior to those grown some years ago. Set plants six or eight inches apart. I offer first-class seeds of the following splendid races:

## New Large-flowered or Grandiflora Phlox.

This race has very large, showy flowers in huge clusters, and the diversity of color and variega-is is nameless. The plants are robust, bloom abundantly, and make a grand display in a group or My collection of this fine Phlox is complete, and all the sorts are included in my special mixture. tions is nameless.

Brilliant 5   Cœrulea striata 5
---------------------------------

## New Hortensiæflora Phlox.

BRILLIANT-FLOWERED.)

Special mixture, 4 pkts. 10 cts., 1 pkt. 3c.

These are not so large in the size of the individual flowers, but the clusters are very graceful and very abundant. For pots as well as for showy beds, they are desirable, the plants being of dense growth, and

the colors brilliant, varied and beautiful.	of garden seeds. Dark feet, I tile willte, bright scarlet,
Rose 5   Chamois rose 5   Cinnabar scarlet 5	Pale Yellow, Brown Red and Cinnabar, each 5 cts.
White 5 Pink, white eye 5 Rose, carmine eye 5	Special mixtures all colors, 4 pkts., 1 pkt. 3 cts.
	Compact Dwarf sorts, mixed 4 pkts. 10c., 1 pkt. 3
Scarlet 5   Triumph 5   Rose, white eye. 5	
Purple 5   Violet starred 5   Brilliant searlet. 5	Fireball, bright scarlet, globular, 4 pkts. 10c., 1 pkt. 3
Complete special mixture, 4 pkts. 10 cts., 1 pkt 3	Snowball, pure white, globular, 4 pkts. 10., 1 pkt 3
Complete Special Mixture, including all varieties	s described above, 4 pkts. 10 cts., 1 pkt

Cuspidate and Fringed Phlox.—The flowers of this class have cut and fringed petals. They are much admired by some persons. Alba, white; Coccinea, scarlet; Blue, marbled; Purpurea, purple; Rosea; Salmonea, salmon, and Violacea, each 5 cts. All colors in special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Semi-double Phlox.—These bear semi-double flowers of the leading colors. They are fine for pots or garden beds. Dark Red, Pure White, Bright Scarlet, Pale Yellow, Brown Red and Cinnabar, each 5 cts. Special mixtures all colors, 4 pkts., 1 pkt. 3 cts.

Mr. Park: I received a free packet of your Phlox Drummondii and they surely are great beauties. They are the prettiest I ever raised. They are all different colors. They don't mind the frost, for they are blooming as prettily now as in mid-summer, although this is the twenty-sixth of October.—Mrs. Vena B. Hefner, Braxton Co., W. Va., Oct. 26, 1905.

Mr. Park: I know of nothing that will give more satisfaction than the common Phlox Drummondii, with its good blooming qualities and variety of colors. I had a border of them that attracted more attention than anything else. They are so easily cultivated. J. E. Glossie, Butte Co., S. D., Oct. 24, 1905.

### Polygonum.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 c. 

### Phacelia.

Special mixture, 4 pkts. 10 cts.,1 pkt. 3c. 

Mr. Park: I first bought seeds of you eleven years ago, and since that time have had ample opportunity to be convinced that no one else sells better or cheaper seeds. Your liberal premiums, extras, sample packets and special cheap collections, in connection with the reliable quality of both seeds and plants produced therefrom, are always sure to give entire satisfaction.—Mrs. A. H. Bowdoin, Otero Co., N. M., Oct. 17, 1904.

# Portulaca, New Double and Single.

Complete mixture of all colors, single and double, 4 packets 10 cts., 1 packet 3 cts

The New Large-flowered Portulaca is hardly excelled as a garden annual. The little silvery seeds may be sown as soon as the ground can be worked, and in a very short time the plants will appear, grow rapidly in the hot sunshine, branch freely and show a mass of large, bright flowers every morning. They are low and spreading and if set six in the same than the same transfer of th ing, and if set six inches apart, they will completely cover the bed. I have seen magnificent circular beds of Portulaca, the center being raised, and the colors planted in rings of white and rose, and scarlet and gold. The doubled-flowered varieties are even more attractive than the single, but all are fine. I offer the best quality of seeds, and my complete mixture contains all the varieties of both double and single kinds in fair proportion. See engravings.

Note.—For carpet beds nothing is finer than Portulaca. By sowing separate colors designs may be produced with ease. Plants are dwarf and drouth resisting and produce freely quantities of brilliant flowers, white, pink, rose, magenta, red, cream, yellow, orange and striped. Fancy shaped beds may be sown with mixed seeds. Square beds may show in strips of colors or round beds in rings. They will be ever visited with admiration when in bloom. Sandy soil should be selected for the beds.—Olifford N. Raynor.

SINGLE PORTULACA FLOWERS AND PLANT.

DOUBLE VARIETIES	OF FULLUATUR.
White 3	Salmon
Golden yellow 3	
Gold striped 3	
Rose, striped red 3	
Special mixture of double va	rieties, 4 pkts, 10c., 1 pkt.

Year. Portulaca, with its many-colored little flowers, looks so cool and fresh in midsummer and antumn. I never see how anybody can be without it. It is worth its cost ten times. I had some for edging It just looks like wax. I had some in a hanging basket and it just stood out around the basket, and was a mass of rich colors, surpassingly lovely. A more beautiful flower cannot be found. People would say, "Why, what is that; I must have some of it, if it takes all the money I have got." I would say, "Go to Mr. Park".—Lizzie Hubbard, GreenwoodCo., Kan., Oct. 3, 1995.

### Ricinus.

Special mixture, 4 pkts. 10c., 1 pkt. 3c.

Borbon. arboreus 5 Mirabilis ..... Sanguineus ..... 5 Zanzibariensis ... 5

Enormis ...... 5 Maculatus..... 5 Niger. ..... 5

Splendid semitropical annuals. R. arboreus grows
14 ft. high, and is
very showy in a
group. R. sanguineus, 5 ft. high, has
reddishfoliage, and
R. mirabilis 3 ft. high, bronzefoliage The three make a fine group. R. Zanzibariensis grows 5 ft.high, with large leaves. All arevery

fine for a hedge or back-ground. Grown as easy as corn. Mr. Park: My Castor Oil Beans grew ten feet high, and the leaves were very large and graceful. I wish they might live and grow all the year.—Mrs. Henry Moore, Portage Co., Ohio, Oct. 27. 1905.

### Rudbeckia.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3c.

Bicolor Su-perba...... Semi-plena 5 Special mx'd 4 pkts. 10c. 1 pkt...... 3

A free-bloom A free-blooming, showy annual. Plants grow a foothigh, and bear single and semi-double flowers, Seedlings are easily grown, and begin to bloom early. This plant is a near relative of R. laciniata, or Golden Glow, but growsonly two feet high. It forms a showy group

Saponaria, Scarlet Queen, 5c; Calabrica, mx'd, 5c; Ocymoides splendens, 5c; special mixt., 4 pkts. 10c, 1 pkt. Scarlet Queen is a low, compact annual, fine edging, bearing innumerable rosy-scarlet flowers. Calabrica, is similar, pink and white. Ocymoides is an elegant, trailing perennial, for mounds, rockeries or cemeteries; rose.

# Salpiglossis, New Emperor.

Special mixture, all sorts, 4 packets 10 cents, 1 packet 3 cents.

The New Emperor Salpiglossis is an exceedingly attractive annual. The plants grow three feet high and become swaying masses of very large Petunia-like flowers with a rich, velvety texture, and in the most gorgeous colors, as royal purple, crimson, rose and sulphur, many of the flowers showing distinct pencilings of gold, carmine and violet. Indeed only those who have seen these superb flowers can have any concep-tion of their richness and beauty. The plants are of easy culture from seeds, and should be set ten to twelve inches apart in a sunny bed. The size of the flowers will be improved during hot weather by a mulching of stable litter. The plants bloom from July until frost, if not allowed to seed. This is a splendid annual and cannot be too highly praised. I freely recommend it.

Brilliant crimson		
Deep bright scarlet	5	Rose 5
Purplish brown	5	Sulphur 5

Mr. Park: Last spring I bought some Salpiglossis seeds of you and the plants have given me so much pleasure that I must tell you about them. I have tried Salpiglossis seeds from other dealers, but the plants were always straggly and unsatisfactory. These from your seeds, however, were compact in growth and bore many large flowers, which were beautifully colored and marked. We have had some hard frosts, but they are still blooming. Mrs. H. A. Cawley, Camden Co., N. J., Oct. 16, 1904.

Mr. Park: If those who cultivate flowers would try a packet of your Salpiglossis seeds the coming spring they would be well repaid. Those I raised were of many colors, with petals like velvet, elegantly veined and penciled. They blossom freely for several months. Mrs. C. E. Davis, Hampshire Co., Mass., Nov. 13, 1905.

## Salvias in Variety.

Special mixture, all sorts, 4 pkts. 10 cts. 1 pkt. 3 cts.

Salvias are beautiful and very showy flowers, the prevailing colors being blue and scarlet. Salvia patens has exquisite blue flowers. Salvia sclarea makes a graceful and attractive display when the plants are massed. The most attractive kind, however, is Salvia splendens, commonly known as Scarlet Sage. I offer improved large-flowering, robust varieties, which are a blaze of rich color throughout autumn. They like a sunny place and plenty of moisture while growing. Fine for beds.

Mr. Park: Tell your patrons who wish a fine blue flower to try Salvia
Patens. It is a lovely shade of dark blue, that color so rare in a flower.

If find it a valuable addition to the flower bed. Mrs. C. E. Davis, Hampshire Co., Mass., Nov. 13, 1995.

VARIETIES OF SALVIA SPLENDENS. Grandiflora, large spikes of scarlet flowers...

Pendula, drooping spikes of scarlet flowers	
Carduacea blue, vermilion anthers 3	Farinacea, bright blue, Prætensis, each

Mr. Park: I wonder that the Scarlet Sage (Salvia splendens is not generally known. It was the brightest, most showy plant in my garden, and everyone who saw it asked its name. It is easily transferred to pots while in bloom. I gave a number to neighbors for winter bloomers; but those left in the ground continued to bloom after nearly everything else was cut down by frost. J. E. Glossie, Butte Co., S. D., Oct. 24, 1905.

Silene, Compact.

Splendid mixture, 4 packets 10 cents, 1 packet 3 cents.

The compact varieties of Silene are charming, hardy annuals for beds and edgings. Seeds may be sown either in fall or spring. The flowers are mostly pink and white, and produced so abundantly as to hide the foliage.

# Scabiosa, New Large-flowered.

Complete special mixture, 4 packets 10 cents, 1 packet 3 cents.

The improved varieties of the old-fashioned Scabiosa, or Mourning Bride. should be found in every flower garden. They are beautiful. The plants are bushy, as indicated in the engraving, and the large, globe-like flowers are produced in abundance throughout the entire season, if freely cut. The improved varieties not only develop full-double flowers nine inches in circumference, but appear in a marvelous diversity of shades—from white to yellow, azure to black-purple flesh-color to fiery-scarlet, etc. I known of no other annual that will give better satisfaction than this new race of Scabiosa. The plants grow from two to three feet in height, bear their huge flowers on long, sturdy stems, and thrive in any garden, while the flowers are showy in beds and excellent for bouquets. The dwarf compact kinds are fine for winter blooming in pots.

# Schizanthus==Butterfly Flower.

Complete special mixture, 4 packets 10 cents, 1 packet 3 cents.

The varieties of Schizanthus are useful alike for either pots in the house, or beds in the garden. The plants are easily started, begin to bloom early, produce their flowers in wonderful profusion, and are showy for a long time. The flowers are rich and graceful, borne upon slender stems, and at a distance appear as if floating in the air, hence are often called Butterfly Flowers.

All colors in special mixture, 4 packets 10 cents, 1 pac	cke	t

# Ten Weeks' Stock in Variety.

FEW persons are aware of the great beauty and useful-fulness of the superb double varieties of Ten Weeks' Stock. Hardly one desirable requisite of a first-class flowering annual can be named that they do not possess. Good habit, handsome foliage, free and continuous blooming, showy spikes of large, double flowers,

rich and varied colors, delicious fragrance, easy culture and freedom from insects are all attributes of this grand annual. The plants are beautiful either in garden beds or pots in the house. Do not let the plants crowd in the seed-box, and trans-

plant with care, that they do not become stunted. Mulch the bed with stable litter as hot weather approaches. The seeds I offer were saved only from selected pot plants by German specialists, and will plants by German spectaness, and war produce a large percentage of perfectly double flowers. The mixture contains the finest colors well proportioned. \*\*Dresden Perpetual or Branching.\*\*
These grow 1½ feet high, and have from June till September an abundance of large, rosette-like, double flowers on long spikes.

Victoria Bouquet, each plant grows symmetrically in pyramidial form, and becomes a bouquet of lovely double flowers of many colors. Mixed, 4 pkts 10c, 1 pkt 3

Large-flowering Wallflower-leaved, an excel-lent class with deep-green foliage, and large, double flowers in brilliant colors. Fine mixture, 4 pks 10c, 1 pk 3

Large-flowering Decarf Pyramidal, of pyramidal growth, bearing huge spikes of full-double flowers. Many rich colors mixed, 4 pkts 10 cts., 1 pkt...... 3

Princess Alice, a splendid branching Ten Weeks'
Stock; planta of good habit, have large spikes of snow-white, double flowers; fine for pots. 4 pkts 10c, 1 pkt... 3

Celestial, pyramidal in growth, every branch terminated with a fine truss of sky-blue flowers. 4 pks 10c, 1 pk 3 Giant Perpetual White, one enormous spike of flowers 1ft in length; early-blooming. 4 pks. 10c, 1 pkt. 3 Complete Special Mixture of all the above fine sorts, 4 packets 10 cents, 1 packet ...... 3

Mr. Park: Among my annuals nothing has been finer than Park's Ten Weeks' Stock. The white, the yellow and the rose colors are my favorites, and they certainly are fine.—Mrs. Samuel Currie, Walsh Co., N. Dak.

Mr. Park: I had beautiful Ten Weeks' Stock I raised from your seeds this year. Some are in bloom now. They look like small roses, they are so double, and some are a beautiful violet color. I like those the best.—Mrs. Smith, Berne Co., Vt., Oct. 12, 1905.

Mr. Park: I had nine plants from a packet of Ten Weeks' Stock received from you. Only one of them had single flowers, and no two were alike. There were pure white, cream, bright pink, two shades of salmon pink, several shades of red and one dark, nearly a violet shade.—Mrs. F. C. B., Humboldt Co., Cal., Nov. 8, 1903.

## Valerian, Fragrant.

Special mixture of all colors, 4 pkts. 10 cts.,

HE Fragrant Valerian grows a foot high, is of branching habit and develops panicles fragrant little flowers of various colors. Although hardy perennials, they bloom the first season. The clusters are fine for cutting for bouquets, as well as showy in the garden. Often called Garden Heliotrope.

# Verbena, Large flowered Fragrant

Complete mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Verbenas are readily raised from seeds, and seedling plants are healthy and vigorous, begin to bloom in a few weeks, and keep up the display until late in the autumn. For beds they are very desirable, as the flowers are produced abundantly and are of rich and varied duced abundantly and are of rich and varied colors, while the varieties I offer have a fragrance that is, perhaps, unequaled by that of any other garden flower. Indeed, a few blooming plants will perfume the whole garden during a summer evening. In a sunny window in winter pot-grown Verbenas bloom freely and make a fine display.

IMPROVED FRAGRANT VERBENAS.

NEW MAMMOTH VERBENAS.

4 packets 10 cents, 1 packet ...

Mr. Park: I wish to recommend your Verbena seeds to all who want beautiful flowers of many colors. From one 3-cent packet of seeds I raised seventeen fine plants, nearly every one different, and their bloom was so profuse it was almost impossible to count the flowers. Some were pink, some purple, some white, and almost every shade of red with white centers and edges. They have been blooming the property of the

NEW LAEGE-FLOWERED VERBENAS.

with large, handsome flowers.—Sophia Berley, Jefferson Co., Ky., Oct. 12, 1904.

Mr. Park: My fragrant Verbenas from your seeds are grand. I have a great variety of colors from one packet of seeds, and such large clusters! The plants are blooming yet.—Mrs. Jacob Karn, Morris Co., N. J., Oct. 3, 1906.

Mr. Park: My Mammonth Verbenas from your seeds were all beauties—bright red, pink, white, purple, some almost blue—the nearest to that color I ever saw.—Mr. W. B. Putman, Wash., Co., Iowa.

Mr. Park: From a three-cents packet of your Large-flowered Fragrant Verbenas, I had several different colors, and such free flowers! I planted some in an urn, and they were a mass of fragrant bloom all summer. One I have taken up for my window garden, a delicate pink shade with a fragrance like the Trailing Arbutus.—Mrs. G. L. Clark, ——— Co., Me., Oct. 9, 1905.

## Viola Hybrids==Tufted Pansies.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

The Tufted Pansies are beautiful, Pansy-like flowers which succeed well wherever a Pansy can be grown. The seedlings start in from ten to fifteen days, begin to bloom in a few weeks and if cut freely will bloom till the snows of winter appear. The colors are varied, and a mixed bed is very attractive. The flowers have the delicious Violet fragrance which everybody admires.

Mr. Park: My bed of Tufted Pansies from your seeds was a beautiful sight, indeed. The colors were exceedingly handsome and everyone admired them, thinking they were the most beautiful they had seen.—Mrs. Hannah Wilson, Fairfield, Co., Ohio, Oct. 24, 1904.

### Zinnia, Improved Double.

HE Double Zinnia is one of the easiest grown and most showy of garden annuals. The plants come quickly from seeds, are easily transplanted, and make a fine dis-play in a bed or border or among shrubbery. Each flower lasts for several weeks, and the plants bloom abundantly until destroyed by frost. The new, improved double varieties I offer are as showy as Dahlias, as varied in color, and bloom more profusely.

New semi-dwarf Zinnias, superb bedding sort, growing fifteen inches high and blooming very freely; perfectly double. Colors white, searlet, golden yellow, crimson, striped, violet, purple, salmon,

Mr. Park: I think for the busy housewife no flower will give better satisfaction and stand neglect better than Park's Semi-dwarf Bedding Zinnias. They are of such compact, bushy form, and of so many bright colors never seen in old-fashioned Zinnias.—Mrs. W. B. Slater, Tompkins Co., N. Y., Nov. 31, 1903.

Mr. Park: I wish every person who does not like Zinnfas could see my Lilliput Zinnfas from your seed. They are beauties—some red, some white, and some with green streaks in the petals. 'Youth-and-old-age" is the grandmother name, a very appropriate one, as the flowers are babies when they begin to bloom, and increase in beauty till full size. I have tried Zinnfas, but never succeeded in this locality until I received seeds from you.—Marie Ferguson, Tuolumne Co., Calif., Oct. 28, 1905.

Mr. Park: The Zinnias from your seeds were just lovely, and are still in bloom. I never cared for Zinnias, thinking them stiff and ungraceful, but I have learned to love them.—Mrs. W. J. Gilbert, Hartford Co., Coun.

### **EVERLASTINGS**

Mixture of Many Kinds, Large Packet 10 cents, 3 Packets 25 cents.

THESE are mostly annuals with straw-like flowers that keep their form and color for years. With few exceptions they should be cut just as the buds begin to expand. Hang in the shade, stems upward, till dry. The grasses are fine for bouquets, either green or dry. All are easily started from seeds, and attractive in the garden as well as useful for bouquets.

Acroelinium, graceful and pretty, half-hardy an-

Waitzia grandiflors, a foot high, with branches terminating in numerous small yellow flowers... Ornamental Grasses. Job's Tear's, stripe of Femiliastan Job's Tear's, stripe of leaves 3. ### ORNAMENTAL ANNUAL VINES.

lixture of Many Kinds, Large Packet 10 cts., 3 packets 25 cts.

THE ANNUAL VINES here offered grow quickly from seeds, and are very effective when trained upon strings about the porch, doors and windows, or when used to cover summer houses and trellises or form screens for a walk or unsightly fence or building. They are among the most useful plants in giving a cozy, home-like appearance to a place, and their cultivation should be more common. Support should be given early. If neglected till vining begins, the plants become stunted and injured in growth

### Cardiospermum in Variety.

Mixed, 4 packets 10 cents, 1 packet 3 c

KNOWN as Balloon Vine be-cause of its balloon-like seed vessels. As trellis vines for graceful greenery no plants excel those of Cardiospermum. Everybody admires them.
They grow eight feet high, and quickly cover their support. They can be highly recommended.

Special mixture, 4 pkts 10c, 1 pkt..... 3
Mr. Park: A nice vine for a screen is Cardiospermum. We plant it with Cypress vines, and both grow nicely together. It will climb up a string or over a bush and grow to quite a good height if trained to do so, or, be content to creep along over anything it comes to. It is easy to grow, and is not dense and cumbersome as some other tender vines.—Mrs. Christine Sturkey, Jefferson Co., Mo., Nov. 8, 40s.
Mr. Park: Why is as little said con-

Mr. Park: Why is so little said con-cerning Cardiospermum, or Balloon Vine? It is a curious, half-hardy, an-nual, climbing plant and covers con-siderable space.—C. E. P., Queens Co.

## Cobœa Scandens. Price, 4 pkts. 10 cts., 1 pkt. 8 cts.

THIS is a beautiful vine growing quickly to the height of from twenty to thirty feet. Both foliage and flowers are graceful and attractive. The leaves are extended into long, graceful tendrils which attach themselves to a string or wire or branch, and the large, bell-shaned flowers are produced continually shaped flowers are produced continually throughout the season. If grown in a pot it will bloom in the house. In the South the vine is hardy and will bloom for several years. Easily started from seeds, which should be planted addewise and not too freely restant edgewise, and not too freely watered till growth begins. The original species has purple flowers, and is the handsomest of the lot. The plants thrive particularly on the south side of a wall or building.

Mr. Park: Of all the climbers, I have none that give me so large a return for my trouble as the Cobea Scandens. It is equally as good for out-of-doors as for house culture. It has pretty foliage and large, bell-shaped flowers that open as clear green, but turn to a lovely purplish blue.—Amanda Gray, Johnson Co., Ill., Oct. 11, 1905.

Mr.Park: I planted your Cobea Scandens seeds in March in the kitchen window. Early in May I set two of the plants by my porch. They covered it and ran up the sides of the house. There were blossoms on the vine by July 10th. Night frost did not hurt it a bit, and now, Nov. 8th, there are still flowers on the wall vines. I set it in rich, loose soil, and watered several times with liquid manure. It was a wonder to all who saw it, and no one knew what it was.—Mrs. Christine Sturkey, Jefferson Co., Mo., November 8, 1905.

Abobra viridifiora, a lovely rapid-growing peren-nial gourd vine; flowers green, succeeded by pretty filbert-sized scarlet fruit; roots tuberous

### Cypress Vine in Variety.

Complete special mixture, 4 pkts. 10 cts., 1 pkt. 8 cts.

A N exceedingly handsome vine, growing from eight to ten feet high, valuable for a trellis or to ornament the pillars of the veranda. The foliage is a rich, dark green, feathery in appearance, and decorated throughout the season with a profusion of bright, delicate star-like flowers, scarlet, white and rose in color, beautiful and attractive. The seeds should be sown in a seed box and the soil kept rather dry after the first watering. Do not transplant until the weather becomes warm.

Mr. Park: I grow a Cypress Vine on the south porch every year. I give it plenty of water, and it grows 10 to 15 feet high, and is so fine and lacy that everyone who sees it is delighted.—Jennie M. Bamer, Glasford, Ill., Oct. 7, 705.

Mr. Park: My Cypress Vines from your seeds were beautiful. What is

Mr. Park: My Cypress Vines from your seeds were beautiful. What is more graceful than their delicate, fernlike foliage and bright star-shaped flowers. If I could only have one vine in my garden I would choose Cypress.—Mrs. J. Hagerman, Sag. Co., Mich., Oct. 26, 1965.

Mr. Park: A Cypress Vine last spring gave quite a pleasurable surprise. I planted a circle at the roots of a dead peach tree, and it was covered with little red and white stars.—Miss. Mary Robinson, Cedar Co., Ia., Oct. 11, 1905.

### Gourds and Cucumbers in Variety.

Complete special mixture, 4 pkts. 10 cts., 1 pkt. 3 cents.

The Gourds are ornamental in foliage, flowers and fruit, and can be used very effectively about the garden. The use of the Dipper, Dish, Bottle, Sugar Trough, Egg and Club Gourds is indicated by their names. The latter has fruits from two to three feet long, and is sometimes advertised as Japan Cucumber, but is generally called Hercules Club. An Italian florist says, "This Gourd furnishes quite an excellent dish; cut into pieces three inches long, take out the seeds, fill in a stuffing of meat, etc., boil, and serve with tomato sauce." Will you have some? The small, fancy Gourds are showy on the vines, and excellent toys for children. The Dishcloth Gourd has showy yellow flowers, and network of the Gourds is useful for fancy work, and for scouring and washing. The Hundredweight Gourds make excellent pies. The various species of Cucumis are handsome vines. All are interesting and ornamental, and worthy of

cultivation. Start the seeds in the window box and set out when the weather becomes warm. In the South, plant the seeds where the vines are to grow.

A STATE OF THE PARTY OF THE PAR

packets 10 cents, 1 packet.......

Mr. Park: Last spring I bought of you a package of Gourd Seeds and they all grew well. Last week I took the Gourds (fancy) to our Fair at LaSalle, and secured 2d prize and a medal on them—all of which goes to show that Park's seeds are all right. There were six competitors.—Wm. Shaw, LaSalle Co., Ill., Oct. 9, 1905.

Mr. Park: Last spring I planted a package of your mixed Gourds. I had Goose Egg climbing a tree, and the crooked Gourds for geese. I am the popular grandmother with the children of the little village as long as my Gourds last.—Marie Ferguson, Tuolumne Co., Calif., Nov. 3, 1905.

Mr. Park: I planted your Hercules Club Gourds, and one measures 32 inches. No one believes that a Gourd grow that length, unless they see it. Everyone says, "My! I never saw anything like it!"—Mrs. Merritt Abbey, Peoria Co., III., Oct. 11, 1906.

PARK'S SPECIAL MIXTURES.—These mixtures are not the odds and ends of some wholeshe seed house, but are prepared at my establishment under my careful personal supervision, from the best named varieties in well-balanced proportion. You never make a mistake by buying Park's Special Mixtures. They cannot be surpassed.

### Hvacinth Bean==Dolichos.

Complete special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

The Hyacinth Beans (Dolichos) are beautiful, vigorous vines, that bear large clusters of showy, bean-like blue, white and variegated flowers, followed by shining purple seed pods. The plants are as easily grown as Corn Beans, and are excellent for covering summer houses, fences or old trees, or for a porch screen. Seeds and pods are edible.

#### Humulus -- Variegated Hop. Price, 4 pkts. 10 cts., 1 pkt. 3 cts.

A Japanese annual of rapid growth, and one of the most showy and useful of climbers, on account of its dense foliage, blotched and marked with creamy white. Sow the seeds early where the plants are to stand, and furnish string support. Plants start readily and grow from twenty to thirty feet high in a season.

Mr. Park: Anyone desiring a handsome vine for a porch should try your Variegated Hop—It pleases all who see it. Although an aunual, it seeds itself freely, so there are always plenty of plants after it is once sown.—Mrs. Mary C. Bramhall, Bradford Co., Pa., Oct. 10, 1904.

Mr. Park: I planted Variegated Hop in the centre of my Pansy led and gave it an A-shaped trellis, which is completely covered on both sides. Every one who saw it said "How lovely!"—Mrs. True Harmon, Cass Co., Neb., Oct. 19, 1904.

Mr. Park: Your Variegated Hop grew wonderfully fast and the leaves were beautifully colored.—Mary Overholt, Miller Co., Ark., Oct. 27, 1904.

#### Maurandya. Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

A dense, graceful vine, growing six feet, covered with lovely bell-shaped flowers in autumn. Entirely too

neglected.	
Antirrhiniflora, blue	5
Barclayana, blue	5
Barclayana, white	ō
Emeryana, rose	5
Purpurea, purple	5
Semperflorens, blue	5

Mr. Park: I must tell you of my Maurandya. I have one that is over twelve feet high, and covers over eight feet wide, just from one little tiny black seed. It has bloomed ever since July and is full of bloom now, Oct. 15. It is the loveliest window vine I ever saw.—Mrs. Wilson, Garfield Co., Okla., Oct. 30. 1995.

Mr. Park: Maurandya is pretty and stands severs frosts.—Mrs. E. S. Y., Pen. Co., Me., Oct. 24, 1904.

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts.

Much like Morn-

ing Glories in foli-

age, flower and habit. The vines are all of rapid

growth, and fine for

trellises, walls or screens. All are easily raised.

Coccinea, scarlet....... 3
Lutea, yellow......... 3
The above bear small flowers that remain open for several days; vines rapid in growth and beautiful.

Loasa laterita, a showy annual vine; orange flowers; foliage covered with stinging hairs.....

Lophospermum scandens, a handsome vine, the root of which may be wintered in the cellar. Velvety foliage and large, tubular roes flowers. Sow in a window, early, to bloom in summer. On a pot trellis it blooms well in winter.

Moon Flowers. Easily grown from seeds. Bona Nox has clusters of small flowers, and Mexican White bears large flowers. Both are very frag-rant and free-blooming. Separate or mixed ..... Mina lobata, a quick-growing vine much like Ipo-mea coccinea, but bearing racemes of scarlet flowers not unlike scarlet Salvia at a distance....

# Morning Glory, Giant Clustered.

seeds, and the most desirable and beautiful

THE engraving represents a rare Morning Glory of surpassing beauty—one which excels the old-fashioned and Japanese varieties so far that a comparison with them would be an injusticelto it. It is variously known as Ipomoca Rubro-occurlea and I. Violacea Vera, but the common name, Giant Clustered, seems appropriate, for it is a giant in vine, foliage, flowers and clusters. It will grow vigorously to the height of 30 or 40 feet, clothed with dense, rich foliage, and throughout the entire season is a glorious mass of white and sky-blue flowers, shading to white at the centre, often strikingly marked with distinct pinkish violet rays. These are borne in huge, long-stemmed clusters produced at the leaf axils, and stand out above the foliage, showing the magnificent, large flowers in the most attractive manner. The clusters show buds and flowers in various stages of development, and new flowers appear every morning in wonderful profusion all over the vine. No person who has once cultivated this grand vine will discard it. All other Morning Glories in common cultivation are insignificant beside this elegant sort. You may form some idea of its beauty from this description, but when you see the blooming vine in all its glory you will exclaim, "The half was never told." By all means add this grand vine to your seed order, start the seeds in a window box and set out to cover a trellis or fence, or the pillars of the piazza. When in bloom you will thank me for urging you to try it, for it will probably afford you more pleasure than any other flower about the home. Special colors, 8 cents per packets; special mixture, 4 packets 15 cents, 1 packet 5 cents, 1 packet 5 cents, 1 packet 5 cents, 1 packet 5 cents, 1 packet 6 cents, 2 packet 6 cents, 2 packet 6 cents, 2 packet 6 cents, 3 packet 6 cents, 4 packet 6 cents, 6 packet 6 cents

NOTE FROM A FOREIGN JOURNAL.—This Ipomoea (or Morning Glory) is worth all the trouble aud care that can be lavished upon it. It is a most glorious thing.—S. G. Reed, in English Garden, Oct. 14, 1905.

Morning Glory, For a quick-growing, beautiful vine the improved old-fashioned Morning Glory still claims a prominent place. The large, fresh, silky flowers in golden variegated and striped, give an added charm to the early mornings of summer and autumn. Special mixture, all colors and varieties, 4 packets 10 cents, 1 packet 8 cents.

Morning Glory, The Japanese Morning Glory vines show big flowers in new colors, the result of special attention given to developing idly, and in a warm, sunny situation bloom abundantly. Special mixture, all the fine sorts, 4 packets 10 cents, 1 packet 3 cents.

### Sweet Pea, Park's Large-flowered

Complete mixture, per lb. 50 cents. one-fourth lb. 15 cents, one oz. 5 cents, 4 packets 10 cents, 1 packet 3 cents.

No. 1, Shades of White. This packet includes all the new, chaste shades of white, as pearl white, pure white, cream white, fiesh white and porcelain white. Blanche Burpee, Emily Henderson, Mrs. Sankey, Queen of England, Mont Blanc, Pure White, Butterfly, each, 8 cents per

yellow, The colors are not well defined, but une packet includes all the best yellow shades known. Bronze King, Chancellor, Gorgeous, Lemon Queen, Mrs. Eckford, Oriental, Lady Beaconsfield, each, 8 cents per ounce: per packet......

Sweet Peas are indispensable. It you can have but half a dozen annuals, a border of these charming flowers should be included. The improved varieties I offer were grown for me by a German spec-ialist, and imported. The seeds all grow, and the vigorous, branching vines become a mass of pea-green foliage covered with long-stemmed clusters of large flowers of the most varied and beautiful colors. The fragrance emitted is delicious and enchanting. Certainly there can be no finer strain of Sweet Peas than that of which I offer seeds, and my complete mixture cannot be surpassed. The mixture of shades, as well as my complete mixture, is prepared in my establishment from the finest named varieties. They will all yield marvelous shades and markings. Those who have been cultivating the common varieties will find the new large-flowered and large-clustered sorts I offer a revelation. For hedges or trellises they cannot be excelled; for bouquets and frag-rance they nave no equal.

AT The above collection of mixed Sweet Pea one ounce of each mixture, or ten ounces in all, only 75 cents. Or, one packet of each mixture, 10 packets in all, only 25 cents. The named sorts can also be furnished separately at prices quoted.

Sow in a trench as early as the ground can be worked, and cover only one-fourth inch deep; later as the vines grow, draw soil in till the roots are well protected. As warm weather approaches mulch the ground with stable litter. Give wire or brush support early. Cut the flowers freely to prevent seeding and prolong blooming, Order and plant early. The dwarf sorts are not so desirable as the others, but are useful for contrast. The white is preferred for pots.

Mr. Park: I planted two ounces of your Large-flowered Sweet Peas last Spring, and had a glorious display. The flowers were so large, produced on such long stems, and were of so many hues and colors from pure white to bright crimson—pink, purple and maroon. They lasted until every other green thing was gone. Surely nothing is more sweet, more delicate, or more beautiful than your Sweet Peas.—Mrs. H. Arno, Monmouth Co., Me., October 9, 1905.

Mr. Park: My Sweet Peas this year were the finest I ever had. I think every seed came up. The flowers were very large, single and double, fragrant and of many colors and kinds.—Amy Dobbie, Norton, Kas., Oct. 6,705. Mr. Park: I had a row of Sweet Peas 15 feet long, with wide poultry fencing fastened to well-braced posts at both ends. They climbed high above the fencing and were handsome.—Mrs. H. Moore, Portage Co., O., Oct. 27,05.

Scarlet Runner. == An elegant vine for a warm, dry situation. In a dry season it will grow where many other vines will suffer. Flowers rich scarlet, in large clusters. If cut freely plants will bloom throughout the season. Fine for summer houses or arbors. The seeds are excellent for cooking. I can also supply white and variegated. 5c packet.

## Tropæolum, Giant Climbing.

Complete mixture, Ib. 75 cts., 1-4 lb. 20 cts., ez. 6 cts., 4 pkts. 10 cts, 1 pkt. 3 cts.

HE new Giant Climbing Nasturtiums are as desirable for the flower garden as Sweet Peas. They grow vigorously, have beautiful, clean foliage, begin blooming early, and bloom all the season. The flowers are borne in great profusion, are very large, of silky texture, brilliant in color, and very fragrant. Indeed they possess all of the elements of a first-class vine, and can be used to decorate old fences or buildings, as well as to form a showy hedge or an attractive trellis clump. My seeds are superior, and my mixtures unsurpassed.

Lobb's Climbing Nasturtium. \*-Lobb's Climbing Nasturtiums are considered even handsomer than the most robust varieties. Easily grown from seeds, and fine either as pot plants or bed or border.

Mr. Park: I have a bed of Nasturtiums every year, but have never had anything to compare with what I raised from your seeds this summer. There was every shade "from grave to gay," and every day I had all the blossoms I could pick.—Mrs. H. Jenne, Sullivan Co., N. H., Nov. 4, 1905.

Mr. Park: Oh, my Nasturtiums were fine, the best collection in town, so velvety and fragrant, no two alike. I had a fresh bouquet every morning.—M. E. B. Lattershale, Lyon Co., Ia.

Tropæolum Peregrinum, the beautiful Canary-bird Flower, This is a lovely vine of easy growth, reaching twenty feet in one season. In autumn it is covered with a profusion of yellow flowers bearing a fancied resemblance to a miniature canary bird. Four packets 10 cts., 1 packet 3 cts.

Note.—The Canary Flower is without a rival in lightness and elegance; indeed, one might say it is peerless among yellow flowers. It is a valuable garden vine, thriving in sun or shade, and unsupassed for festooning. It rarely fails to succeed well.—English Flower Garden.

#### Thunbergia Alata.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

Handsome vines six feet high, covered from June till October with bright, showy flowers. Elegant for trellis or low screen. Are easily grown from seeds. Like a warm and sunny situation.

Mr. Park: Thunbergia Alata is a valuable vine that certainly merits general cultivation, as it commences to bloom quite early in the season and blooms constantly until frost. It makes a nice vine for a porch, with its myriads of pretty flowers and clean foliage.—Grace Owens, Joliet, Ill., October 10, 1905.

### BIENNIALS AND PERENNIALS.

THESE are sometimes denominated "The poor man's flowers," because when once established in the garden they will take care of themselves. The Biennials die after blooming, but are mostly reproduced by self-sowing. The hardy Perennials live for years, and often increase in beauty with age. These are choice flowers entirely too much As a rule the seeds are more tardy to germinate than seeds of Annuals, but if given sufficient time there will be little reason for complaint. I urge my patrons to start a large bed of Perennials, because I feel confident they will be pleased when the flowers bloom, and thank me for my importunity.

# Aquilegia = Columbine. Complete special mixture, 4 packets 10 cents, 1 packet 3 cents.

Hardy perennials. Flowers both single and double in form, and of all shades of red, white, blue and yellow. The sorts offered are mostly large-flowered. All bloom in the spring, and some continue to bloom all summer. My complete mixture will show a great variety, and will please all who sow it.

Chrysantha, everblooming, yellow ...... 5

### Adlumia Cirrhosa.

Mixed colors, 4 packets 10 cents, 1 packet 3 cents.

Charming vine with delicate fern-like foliage and waxy pink and purple flowers in clusters in great profusion. The vines will grow 20 feet high, a mass of foliage and bloom, and in dense shade—even where the sun never reaches. Furnish string support. A grand pillar plant for the north porch.

Mr. Park! For a delicate perennial climber nothing can surpass the Adlumia. It is easily grown from seeds. The first season it grows a foliage resembling Maiden-hair Fern, fine for floral work, the second season it is still more beautiful with its clusters of white flowers, which are almost everlasting, and fine floral work.—A. M. S., Pawnee Co., Neb., Nov. 1903.

Armeria, Giant.

Mixed colors, 4 packets 10 cents, 1 packet 3 cents.

A fine hardy perennial, two feet high, with large heads of rose-colored flowers. A choice garden perennial that deserves more attention.

Mr. Park; I bought a packet of, Giant Armeria seeds of you last spring, and have several nice, thrifty plants.— Mrs. Mary Cole-man, Lewis Co., Wash., November 10, 1903. Mr. Park;

Aethionema Grandiflorum (Lebanon Candytuft).—A trailing plant from the Lebanon mountains. Of easy culture; spikes of rosy white flowers continually produced. 4 pkts 10c, 1 pkt 3c.

Abobra, viridiflora, vine... 5 Æthionema grandiflora... 5 Acnithus lusitanicus.... 5 Agrostemma coronaria... 5 Achillea ptarmica, 2 feet 5 Atrosanguinea, crimson 5 Filipendula, yellow... 5 Flora alba, white...... 5 Alyssum sax. compacta... 5 Both kinds mixed..... 5 Anchusa azurea...... 5 Adenophora (Bellflower) 5 Anthericum liliago..... 5 Potaniii.

Adonis vernalis, yellow... 5

Androsace coronopifolia. 5 Aster alpinus, blue......

### Campanulas or Bell Flowers.

Complete Mixture, 4 packets 10 cents, 1 packet 3 cents.

These are beautiful hardy perennials of easy culture. C. Medium is the Canterbury Bell, a grand garden flower. C. calycanthema is the cup and saucer shown in the engraving. C. carpatica and C. pyramid-alis are fine for pote as well as garden beds. C. fragilis is fine for baskets.

OTHER SPECIES OF CAMPANULA.

CTHER SPECIES OF CAMPANULA.

Carpatica, 1 ft. high, beautiful cup-shaped flowers during July and August, mixed.

Fragilis, an elegant, free-blooming, drooping sort; fine for pots and baskets.

Grandis, 2 feet high, flowers 2 inches across, showy; in bloom June and July.

Macrantha, 5 ft. high; broad leaves and large, open flowers; a splendid sort.

Mirabilia, new not malks. Mirabilie, new; not unlike the old Canterbury Bell; very fine.....

Mr. Park: I got a 3-cent packet of your Campanulas or Bell Flowers last spring, and this spring I had such lovely flowers of all colors—pink, blue, purple and white, double and single, and so easily raised.—Mrs. W. A. Wood, Maquoketa P. O., Ia., Oct. 19, 1905.

Campanula Calycanthema

Mr. Park: I would like to tell you about the beautiful Canterbury Bells I raised from your mixed seeds. The colors were beautiful, pink, white, blue and rose, some single and some double. The Cup and Saucer variety were especially handsome. I wish the floral sisters would try your seeds.—Mrs. M. Gibson, Los Angeles, Cal., Nov. 6, 1905.

Mr. Park: All who want something fine should plant Campanula Calycanthema or Cup and Saucer. We had great clusters of blue, white and variegated ones from your seeds, and I do not think we ever had a floom the first year, but are little trouble, and are well worth waiting for. They bloom at the same time as Gypsophila, and the two combine effectively.—L. J., Crawford Co., Ill., Nov. 8, 1905.

Carnations, Garden.
Finest special mixture, 4 packets 10 cts., 1 packet 3 cts.

Showy and deliciously fragrant garden perennials. Flowers very double and of many rich colors, often superbly variegated. The seeds I offer are of the best quality, and will yield the finest flowers. They cannot be surpassed.

Choice Garden Carnations in splendid mixture, 4 packets 10 cents, 1 packet......

Mr. Park: I raised 14 nice Garden Carnations from a 3-cent packet of your seeds. The flowers are beautiful and very fragrant.—Mrs. M. Gibson, Los Angelea, Cal.

Baptisia Australis, blue... Barbarea fol. variegatis... Bellis (Double Daisy)... Betonica grandiflora... Camassia esculenta... Catananche fi. pl., mixed., Cardamine praetensis....

### Delphiniums, Orchid-flowered.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

The new hybrid Orchid-flowered Perennial Delphiniums, or Larkspurs, are of surpassing beauty in the perennial garden. They grow from four to six feet high, bearing long, thickly-set spikes of large, attractive flowers of the richest colors. A plant ive flowers of the richest colors. A plant is fairly represented in the engraving here given. The seeds are not difficult to start, but mostly require from three to five weeks to germinate. A few of the plants will bloom the first season if started early. Remove the flowers as they fade to prevent seed formation, or cut the spikes freely. The plants will then bloom continuously. A group or bed of these flowers in bloom is gorgeous, and always calls forth the enthusiastic praise of all who see it.

Celestial, light blue with white centre; large, showy Ultramarine, rich dark blue with black centre; ele-

ers, handsome spikes

Atrocœrulea, very dark blue; long, dense spikes; very attractive..... Sulphureum, lovely spikes of beautiful yellow flow-

OTHER FINE DELPHINIUMS 

Mr. Park: I have excellent success with Perennial Delphiniums. I have them in the richest soil, and in winter put litter around them, and the first thing almost in the spring they are out of the ground. They grow from six to twelve feet tall and have spikes of bloom from two to four feet long. The various shades of blue are especially fine, as blue flowers are so rare.—M. J. Howard, Washoe Co., Nev.

### Digitalis = Foxglove.

Special mixture, 4 packets 10 cts., 1 packet 3 cts.

The Digitalis or Foxglove is a hardy perennial that deserves more attention. The plants grow two feet high and bear showy, drooping bell-shaped flowers during early summer. They vary in color through shades of white, yellow, purple, pink, etc. Always showy and admired when in bloom. My seeds are from the finest varieties, and my special mixture will yield a splendid collection of plants.

#### Gypsophilia Paniculata.

Splendid mixture, 4 packets 10 cts., 1 packet 3 cts.

One of the most graceful plants, the sprays appearing as fairy white flowers upon hair-like stems. The plants grow two feet high and are covered with myriads of bloom, making a cloud of white; attractive in clumps, and when cut imparting to bouquets or designs a most harmonizing effect. Readily started from seeds.

Mr. Park: I would advise your patrons to get Gypsophila paniculata. Once started it is there to stay, standing all kinds of exposure and drought. No garden is complete without it, and no flower can take its place for decoration in cut flowers.—M. J. Acly, Fergus Co., Mout.

... 5 Dianthus gardnerianus... 6 Dracocephalum grandis... 5 Eryngium giganteum.... 5 Superbue, fringed.... 6 Buyschianum Japo'n... 5 Eupatorium altissimum... 8 Both sorts mixed... 5 Ferula communis... 8 Epilobium hirsutum... 6 Galega officinalis, mixed... 8 Epilobium hirsutum... 6 Galega officinalis, mixed... 8 Erigeron aurantiacus... 6 Galega officinalis, mixed... 8 Erigeron aurantiacus... 6 Galega officinalis, mixed... 8 Erigeron aurantiacus... 6 Galega officinalis, mixed... 8 Fraxinella alba... 5 New hybrids, mixed... 5 Gentiana acaulis, blue... 5 All kinds mixed... 5 Dodecatheon meadia... 5 Erysimum pulchellum... 5 Gerardia,new h'b'ds, mixed... 5 Delphinium Chinese. Dictamnus fraxinella, red
Fraxinella alba...
Both colors mixed.....

### Hollyhock, Park's Superb Double.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

When well-grown from a fine strain there is no more handsome or attractive garden flower than the Double Holly-hock. Whether in a double row or a group the blooming plants are gor-geous, and are well shown by my artist in the accompanying fine wood engrav-ing. I offer seeds of a very superior strain, the plants of which grow from five to six feet high and become solid stems of foliage and rich double flowers of a wonderful variety of shades. They are certainly unequaled. When started early in pots and set out in May some of the plants will bloom in autumn. By all means start some of these fine Hollyhocks. They will delight you.

Mr. Park: Our Hollyhocks stood just back of the fence, with their majestic heads rising in view. I had other kinds of flowers, but the Hollyhocks were my favorites. They lasted longer and yielded more in return for their care than all the rest.—Mrs. Emma Ridgway, Macoupin Oo, III.

#### Park's New Hybrids.

Mixed colors, 4 packets 10 cts., 1 packet 3 cts.

I offer another race of Hollyhocks, nost of which will bloom the first sea-son if started early They show both single and double flowers, and in all the leading shades—white and cream, yel-

low and orange, rose and red, crimson and scarlet. The plants grow from six to ten feet high, and bloom for several months-Mixed colors, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park: I want to tell you about my Hollyhooks from your seeds. They did not bloom the first year, as they were planted late, but the next summer you should have seen them—great broad blossoms, and so delicate, in all shades from white to darkest red, single and double. One double one had stripes in the petals, the flowers being compound and very curious—unlike any other flower I ever saw. The single ones were simply immense. They looked like crushed silk.—Mrs. Mary F. Davidson, Clinton Co., Mich., Nov. 25, 1903.

Mr. Park: I have some of the finest Hollyhocks raised of seeds got of you. Some were seven and one-half feet high, and of all colors. Everybody would stop and want me to save them seeds. They were both double and single, and bloomed all summer.—Mrs. Laura Norman, Bosque Co., Texas, Nov. 3 1903.

#### Linum Perenne.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

One of the most graceful, as well as most free and continuous-blooming of herbaceous perennials is Linum perenne, the hardy Perennial Flax. The plants grow a foot high, and from spring to fall are a waving mass of blue, white and rose flowers every morning if not allowed to bear seeds. They self-sow and a bed of the plants will not die out. The plants are hardy and will endure for several years.

OTHER SPECIES OF LINUM:

Germanica, mixed

### Pinks, Carnations and Picotees.

Special mixture, all colors, 4 pkts. 10 cts., 1 pkt. 3 cts.

These are all beautiful, deliciously-scented flowers. The plants grow from a foot to eighteen inches high, endure the winter and become a waving mass of rich bloom. All are easily grown from seeds and bloom the second year. Fine for beds, borders and pots. Give a sunny exposure.

Carnations, for borders, splendid large, double flowers, highly perfumed and in all the leading colors from white to dark crimson; also variegated. Plants hardy, very floriferous, and long-blooming. I offer a high-class strain, finest mixed colors, 4 pkts 10 cents,

Carnation, Garden, fine mixed, 4 pkts 10 cents, 1 pkt. 3 Mr. Park: My Garden Carnations; of which I have a large bed, are the flowers for Spring, Summer and Autumn. They are in great clumps two feet across, and in twenty different colors and shades, from dark red and scarlet to delicate pink some white, beautifully fringed, some variegated, no two alike, and all double but three, all from two little 3-cent packets of seeds. They commenced to bloom in April, and are now, Oct. 15th, full of flowers and buds. — Mrs. Wilson, Garfield Co., Wis., Nov. 30, 1905.

#### Pinks, Park's Everblooming.

The new hardy Pink, blooming throughout the summer; flowers large and handsome, single, semi-double and double, in fine colors, richly scented and beautiful. Cut freely to prevent seeding. Mixed, 4 pkts 10 cents, 1 pkt 3.

Mr. Park: One of the most satisfactory plants I have is the old-fashioned clove-scented Pink. It is a hardy perennial, blossoming in May and June, the flowers sweet and beautiful. The foliage forms a mat of lovely green.—H. E. S., Soldier, Kans., Oct. 6, 1905.

Mr. Park: Last year I purchased some Pink seeds of you. I sowed them in boxes in May and when the plants were large enough transplanted them in the garden. They were pink, white, two shades of red and scarlet. They have been a constant succession of flowers from early spring until late fall, neither drought nor hot sun affected their bloom. The scarlet ones are especially beautiful and glow like rubies in a setting of green. Frost does not injure them.—Mrs. H. C. Calhoun, Washtenaw Co., Mich., Oct. 11, 1904.

Platycodon. Special mixture, 4 pkts. 10 cts.,1 pkt. 3 cts.

From Manchuria we have a beautiful Bellflower sometimes known as Campanula grandiflora, sometimes as Wahlenbergia, and sometimes as Platycodon. I list it under the latter name. The plants grow from a foot to eighteen inches high, erect in form, and bear at the summit a cluster of large, cup-like blue and white flowers, single and semidouble. This is a hardy, tenacious perennial, and one of the finest garden flowers in existence. It will take care of itself when once established.

Mr. Park: My Platycodous from your seeds are so fine that I wish all who raise flowers would try them. They are perfectly hardy and come up every year. I also have some others, but they are poor compared with the beauty of those raised from your seeds.—Mrs. Lillie Baker, Taylor Co., Tex., Oct. 18, 1904.

Platycodon.—The Platycodon is a valuable plant, growing about three feet high. It is a hardy perennial and requires no care—only a place to grow. The flowers are bell shaped. They are fine for cutting and quite distinct in form and color.—Hattie E. Mead, Chittenden Co., Vt., Oct. 27, 1905.

Poppy, Perennial Hybrids.

Special mixture, all varieties, 4 pkts 10c.,1 pkt 3c. Glorious garden flowers are the New Hybrid Perennial Poppies, a splendid collection of which I offer in colors. The plants are hardy and last for years. They grow two or more feet high, clothed with handsome foliage, and surmounted with enormous, rich-colored flowers, six to twelve inches across, varying from creamy white through shades of orange scarlet to dark, glowing crimson. They bloom in June, and at that time nothing in the garden is more attractive. The seeds are slow in starting and should be given

several weeks to germinate. 

Papaver Nudicaule, the Beautiful Iceland Poppies.

#### Primula, Hardy Perennial.

Special mixture of many sorts, 4 packets 10 cents, 1 packet 3 cents.

I would ask special attention to the hardy Primroses I offer. They are beautiful in foliage, beautiful in bloom and beautiful in fragrance, and a bed or border of them in the garden is always enthusiastically admired. Most of the species are readily started from seeds, and most of them are hardy out doors without protection. They deserve general cultivation, and will doubtless become popular when better known.

Mr. Park: My hardy Primroses from your seeds were a mass of lovely fragrant blooms last spring. They certainly are beauties!—Mary B. Reeve, Ashtabula Co., Ohio. Oct. 1, 1904.
Mr. Park: Several years ago I purchased of you a packet of hardy Primula seeds and raised nine plants. The way those plants grew, blossomed and multiplied is a marvel. They are the pride of my garden.—Mrs. L. Col. man, Chantauqua Co., N. Y., Oct. 17, 1904.

### Peas, Hardy Perennial.

Special mixture, all colors, 4 pkts 10c., 1 pkt 3c.

Grand, hardy vines, blooming all summer when cut freely. Flowers large, in fine clusters. Excellent for a trailing mass, or for covering an old stump or stone heap, as the vines bloom

Rose and Scarlet, each 5 cents. White, Rose and Scarlet, each 5 cents. Special mixture of all colors, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park: My Perennial Peas from your seeds were quite a success this year. They grew and flowered un-til they were eight feet tall, and everybody admired them.—Mrs. R. Johnston, Huron Co., Onis, Oct. 11 1904

### Phlox, Hardy Perennial.

Finest mixture, 4 packets 10 cants, 1 packet 3 cants,

Hardy perennials bearing huge panicles of showy flowers of many fine colors. Seeds start tardily. Showy and beautiful. Finest mixture, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park: Why don't every flower cultivator have a bed of Perennial Phlox? No more useful or showy perennial grows. There are so many beautiful shades and colors, some eyed, while the clusters are as large as saucers and delightfully fragrant!—M. J. Acly, Fergus Co., Mont.

### Pyrethrum==Perennial Cosmos.

Single and double, special mixture, 4 packets 10 cents, 1 packet 3 cents,

The New Hybrid Pyrethrums are sometimes called Perennial Cosmos, on account of their Cosmos-like flowers and feathery foliage. The plants grow two feet or more high and bloom dur-ing summer, the large, showy flowers being of many shades, from rosy white to deep crimson. A few of the plants will produce double flowers. I offer a fine strain of the new, large-flowered hybrids. They are splendid garden flowers and should be generally grown. 

### Giant Sweet Williams.

Special mixture, 4 packets 10 cents, 1 packet 3 cents.

The Sweet William, Dianthus barbatus, has been greatly The Sweet william, Dianton's barbatus, has been greatly improved since our grandmother's day, and we now have larger flowers in larger clusters, and in a greater variety of colors and variegations. All are richly scented, are easily started, and for several years the plants will make a grand display in the garden. If kept from bearing seeds they will bloom almost continuously. If cut down after the early crop of bloom fades, our start will be a provided to the continuous of t new stems will push up and bear flowers in the autumn. I offer

a very superior stra	in or seeds.		
SINGLE	SORTS	DOUBLE SORTS	
Albus, pure white 5 Hunt's margined 5 Dunnet's crimson 5	Oculatus, eyed Auriculaflora Mutabilis, checkered Mixed, 4 pkts. 10c., 1 pkt. le. mixed, 4 packets 10 cent	5   Eyed	i

Mr. Park: Your Sweet Williams are beautiful. All who have seen them say they are the finest they have ever seen. The plants are perfectly hardy, and the flowers very fragrant. Everyone should have a bed of these lovely flowers, as they are easily raised from seeds and need very little care. Mrs. E. A. Perry, Iowa Co., Wis. Mr. Park: In beds or in the hardy border this good old plant is equally beautiful, and should be grown in quantities in order to enjoy the different markings and forms. Improvement has been great, and the large form, both double and single, and brilliant colors of the Sweet William to-day bear little resemblance to the old sorts. A rich soil and plenty of moisture while growing is essential to success. The flowers are produced in large numbers and are very lasting. Seeds are freely produced and germinate readily. They may be raised with ease. Olifford N. Raynor, Suffolk Co., N. Y.

#### Wallflower, Non plus ultra.

Single and double, all colors, finest mixed, 4 packets 10 cts., 1 packet 3 cts.,

Walliowers are prized for their fine habit, handsome flowers and delicious fragrance. The plants are hardy in porous, well-drained soil, and bloom early in spring. The seeds I offer are from a superb European collection, embracing cream, canary, golden yellow, blue, brown, red, crimson and violet, all large-flowered and handsome. Single sorts mixed or double sorts mixed, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park: I wish you could see my Wallflowers raised from your seeds. They are just grand. I can truly

# Seeds of Choice Window Plants

THOSE who succeed with the common annuals will find such pot plants as Abutilons Asparagus, Carnations, Cinerarias, Cyclamen, Geraniums, Lantanas, Heliotrope and Primroses of easy culture from seeds. Achimenes, Begonias, Gloxinias, Gesnerias and the like have much smaller seeds, and the plantlets require more skill in handling. I supply full cultural directions with the seeds, however, and any careful person may expect good success by following the instructions on sowing and after-culture.

### Asparagus, Decorative Species.

Complete Mixture, 4 pkts 10 cts., 1 pkt 3 cts.

Among the most fashionable as well as beautiful foliage, basket and pot plants for the window are the various species of Asparagus. They are easily grown from seeds, and will bear ill treatment and neglect that would de-stroy many of the less tenacious plants. All of the species have fine, plume-like. foliage, and are of charming effect. They are plants for everybody, and are highly satisfactory under ordinary conditions. The new one illustrated, A. decumbens, like the others, has elegant foliage, and appears well when made up with Sweet Peas or other flowers in bouquets. It is one of the best.

Mr. Park: I am very much pleased with the Decorative Asparagus plants I raised from a packet of your mixed seeds. One of them is different from any I have ever seen before, and is, if anything, even prettier than the Sprengeri. Mrs. F. M. Young, Penobscot Co., Me., Oct. 6, 1904.

Mr. Parit I have a lovely Asparagus Sprengeri raised from your seeds which is a wonder to all beholders. The plant fills a large pail and its beautiful fronds trail down over five feet in length. Mrs. G. Bone, Hardin Co., Ohio, Oct. 26, 1904.

Mr. Park: I raised five plants (three different kinds) from a packet of your mixed Asparagus seeds. They are easily treated and look well in any window, and their fine, graceful foliage is very handsome. Hattie Sargent, Haverhill Co., Mass.

### Abutilon, New Hybrids.

Special mixture, 4 packets 10 cents. 1 packet 3 cents. One of our most desirable window plants is Abutilon, or Flowering Maple. It is a half hardy shrub that thrives under pot culture, and blooms freely in either winter or summer. The foliage is graceful and handsome, and the large, showy flowers in various fine colors hang like bells upon the plant, suggesting the common name often used, "Bell Flower." I offer seeds of a choice strain of the new, compact, brilliant-colored hybrids, which cannot but please those who sow them. The plants start as readily as Balsams, and you will surely succeed with them. ceed with them.

# Begonias in Splendid Variety. Special mixture, all sorts, 4 pkts. 10 cts. 1 pkt. 3 cts.

Begonias are an important class of flower tered beds on the lawn. The plants bloom continuously for months, and while showy in flower they are equally attractive in folio age. They are easily cared for and are sure to bloom. The tuberous sorts bloom mostly in summer, and the fibrous-rooted ones in summer and winter.

#### Coleus, New Fancy leaved.

Special mixture, 4 packets 10 cents, 1 packet g cents.

The new Coleus hybrids are grand foliage plants for either pots or beds. They are very easily raised from seeds, and the leaves are of many shapes and sizes, and all richly colored, blotched, spotted, veined and marbled. I can supply the choice kinds separately, or all in special mixture. My seeds are saved by skillful Coleus specialists in Germany, and imported. There are none better, and plants from them will be a revelation to those who know only the older Coleus.

### Calceolaria, Hybrid Herbaceous.

These easily-grown but much neglected window plants are, in their improved form, as beautiful as Orchids, the varieties being of many superb colors, and often spotted, blotched and striped in the most pleasing and picturesque manner. The seeds are small, but as easily cared for as those of Gloxinia, and the only insect likely to trouble them is Aphis, which can be ef-fectually kept down by sprinkling tobacco dust upon the soil in the pots, and dusting it upon the leaves when infested. I offer seeds of the very best strains fer seeds of the very obstances in cultivation. Started in spring or early summer the plants will bloom the following winter and make an elegant, novel display in the window.

Self-colored, mixed..... 5
Painted and Margined.... 5
Fancy Striped... 5
New Dwarf, mixed..... 5 Special mixture, 4 pkts. 10 cts., 1 pkt... 3

Mr. Park: From a three-cent packet of your Calceolaria seeds I raised plants enough for myself and two friends. Everyone admires their lovely blossoms, and strangers passing by stop to in-quire what they are. Mrs. Libby, Somerset Co., Me., Oct. 19, 1904.

### Carnations for Winter.

For winter-blooming I offer a strain of Car-nations easily grown from seeds, and bearing large, double, richly-scented flowers of all the choice shades of white, rose, red and yellow, s well as variegated. The seeds are sown in the spring, and when large enough the young plants are bedded out in a sunny spot in the garden, kept well watered during dry weather, and the blooming shoots pinched out as they appear. In August or early September they are potted and removed to the window or conservatory, where they will bloom freely throughout the winter. Avoid the common garden Carnations for the window. They will not prove satisfactory. Finest mixture, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park: From one three-cent packet of your seeds I raised a wnole windowful of Carnations. Their blooms were beautiful and about as fine as the florists' Carnation, while there were so many handsome colors and shades. A. R. L. Cortland Co.. N. Y., Oct. 7, 1904.

Mr. Park: Among my house plants I have some lovely winter-blooming Carnations grown from your seeds: The part of the seeds of the seeds

Mr. Park: My Winter-blooming Carnations from your seeds were grand. They were so fragrant. One flower was alone worth the cost of the seeds. Mrs. P. T.Piercy, Gilmer Co., W. Va., Oct. 13, 1904.

Mr. Park: I had good luck with the Winter-blooming Carnation seeds bought of you. I planted them the 16th of April, and I think every seed germinated. The plants grew nicely and are now loaded with buds. Mrs. Laura Knight, Morgan Co., Ill., Oct. 24, 1904.

Convolvulus Maurttanicus .-- A handsomelvine for a bracket pot or basket, very easily grown from seeds, and bearing an abundance of small, blue, Morning Glory-like flowers upon pendant leafy sprays. The seedling plants soon come into bloom, and, are showy for a long time. Price, 4 pkts. 10 cts., 1 pkt. 3 cts. Cuphea.—Shrubby greenhouse species bearing long, Chelone-like flowers of rich scarlet and gold, and making a fine display in beds in the garden in summer and in pots in the window in winter. C. Platycentra, C. Rezli, C. Eminens, C. Strigulesa and others, separate, 5 cts. per pkt.; mixed, 4 pkts. 10 cts., 1 pkt. 3 cts.

### Cineraria, Park's Fine Hybrids.

Special mixture, 4 parkets 10 cents, 1 packet 3 cents.

I ask special attention to the splendid strain of Large-flower ed Cineraria Hybrids offer. They are among the most generous and beautiful of window None are flowers. more attractive, and few are more easily grown. The seed start readily, an plants begin to blood in nine or ten month To avoid green fly, put tobacco siftings or chopped tobacco stems upon the soil. Shift into larger pots as the plants grow, and shade from mid-day sun. The seeds offered are from a very super ior strain, and can be depended upon to pro-duce plants of fine form, and flowers of grand size and colors.

fine quality, mixed colors 5

antha Stellata.

also offer the new floriferons Star Cinerarias. These are very graceful, the flowers being smaller, of various forms, and show many colors and variega-tions. They are fairly shown in the engraving. They are taller than the Choice Hybrid varieties, but far more free-blooming, and are very beautiful. I offer a first-class strain. Finest mixed, 4 pkts. 10 cts., 1 pkt. 3 cts.

### Chrysanthemum, Veitch's Japanese.

Finest mixture, 4 pkts 10 cts., 1 pkt 3 cts
It is not commonly known that the popular Chrysanthemums exhibited at fall shows may be successfully raised from seeds. If started early in spring the plants will bloom in the autumn. The seeds germinate promptly and the plants should be given a shady place and plenty of water to promote their development during the summer. Keep them in pots, shifting as often as the roots begin to crowd. The flowers are very double and of many shades of white, yellow, rose and red. I offer first-class seeds. Finest mixed, 4 pkts. 10 cts., 1 pkt. 3 cts.

Mr. Park: From a packet of your Chrysanthemum seeds I raised seven fine plants. They are now coming into bloom and are as handsome as Chrysanthemums can be. Allen H. Taylor, Burlington Co., N. J., Oct. 5, 1994.

Mr. Park: I was much pleased with the Chrysanthemums raised from your seeds. They were very double and just covered with blossoms. They live through very severe frosts. M. E. C., Oxford Co., Me., Oct. 9, 1994.

### Cyclamen, New Giant-flowered.

Special mixture, 4 pkts 10 cts., 1 pkt 3 cts.

The Cyclamen is a very satisfactory plant The Cyclamen is a very satisfactory plant or the window, blooming well in winter and howing exquisite, attractive flowers in rich and beautiful colors. No plant is easier to tart from seeds, and bloom can be expected a eighteen months from sowing. The seeds require a month to start. I offer a superbitrain of the finest large-flowered varieties in all the choice colors. My mixture contains the colors well proportioned. ill the colors well proportioned.

Butterfly Cyclamen.-The new Papilio or Butterfly Cyclamen.—The new Papilio or Butterfly Cyclamen is a novelty of great beauty. The flowers are fringed, as shown in the engraving, and come in the colors White, Rose, Red and White with Red Eye. I can supply the colors separately at 10 cents per packets of flow seeds, or in special nixture in packets of five seeds at 10 cents, or 3 packets for 25 cents. Almost every seed will grow.

Mr. Park: From one 3-cent packet of your Giant-flow-ered Cyclamen seeds I have twenty-one fine plants. I hink every seed germinated, but as I sowed the entire packet in a 10-inch pot some died from being too crowd-id.—Mrs. R. D. Moore, Jackson Co., Gas., Oct. 25, 1905.

Mr. Park: One year ago last spring I raised eight blants

ad.—Mrs. R. D. Moore, Jackson Co., Ga., Oct. 25, 1905.
Mr. Park: One year ago last spring I raised eight plants
of Giant Cyclamen from seeds purchased of you. Last
winter three of them bloomed, just enough to show their
beauty, although the tubers were only about one inch in
diameter. At present they measure two and one-half
unches across and are full of buds, which will soon make
a grand display. The foliage is lovely, and when in full
bloom the plants are a grand sight. I find them very
assily raised from seeds, and shall never regret the little
trouble they were to me.—Mrs. F. R. Stilson, Ingham
Co., Mich., Oct. 24, 1905.

Mr. Park: I sowed a packet of your Cyclamen seeds, and every seed grew.—Alice L. Hale, Linn Co., Mo., Oct. 11, '05.

PAPILIO OR BUTTERFLY CYCLAMEN.

#### Francoa Ramosa.

-Price, 4 packets 10 cts, 1 packet 3 cts. A greenhouse perennial of easy culture, belonging to the Saxifrage family. Grows two feet high, has fine lyrate foliage, and pure white flowers freely produced on long, branching spikes. The seeds start readily, and if sown in April will produce plants that will bloom freely the next season. Plants

do well bedded out in summer, and can be wintered in any frost-proof room. 4 pkts 10 cts, 1 pkt 3 cts.

Eupatorium Weinmannianum

Special mixture, 4 pkts. 10 cts., 1 pkt. 3 cts. This new plant can be grown in the gar-den, where it attains the height of ten feet, branching and becoming a dense bush, lit-erally covered with its clusters of white, sweet-scented flowers. In a pot it is not so large, but becomes a compact, symmetrical plant, blooming beautifully in winter, and eliciting much admiration and praise. It deserves a trial. Price, 4 packets 10 cents, 1 packet 3 cents.

One of the most desirable foliage plants for the window, growing several feet high, dense, attractive and even more graceful than a Palm. Water freely while growing and avoid root-crowding. After blooming water sparingly, rest for a few weeks and repot. Seeds start readily and the plants soon become fine specimens.

# Gloxinia, New Giant Hybrids. Special Mixture, 4 pkts 10 cts., 1 pkt 3 cts.

I offer a strain of very beautiful larger flowered Gloxinia The plants are robus and free-blooming and the flowers much larger and finer than those of the ordinary kinds. Seedling plants bloom in from after the seeds ar sown, the flower showing many colors from white through the rich shades of pink to scarlet, and from azure blue to royal purple, some flowers being finely spotted, throated and margined. The seeds are small and require some skill in sowing and watering, but anyone who has had some experience in starting fine seeds need not hesitate to sow Gloxinias. Fines mixtures, splendid Giant sorts, 4 pkts 10 cts., I pkt 5 cts

Mr. Park: I never supposed that anybody but an expert could raise Gloxinias from seeds, but have found out my mistake I purchased a 3-cent packet of seeds from you, followed culturas directions, and raised over forty nice plants. They have not bloomed yet, for it was late when I sowed them, but the foliage is beautiful and they have formed plump little tubers that give promise of plenty of bloom later.—Mrs. Costello, Port. Co., Ga. Oct. 17. '04. Mr. Park: Seedling Gloxinias are very easily raised by anyone used to sowing fine seeds. From one packet I obtained all colors and shades.—Mrs. O. A. L., Somerset Co., Me., Oct. 19, 1904.

Mr. Park: I raised thirty fine plants from one 3-cent packet of your Gloxinia seeds.—L. M. Brandt Mendd cino Co., Cal., Oct. 19, 1904. Giant White, pure white with a yellow throat...

### Geranium, Finest Zonale.

Splendid mixture, 3 packets 10 cents, 1 packet 8 cents.

Geraniums are easily raised from seeds, and seedlings are more robust and healthy than plants from cuttings, while the most of the named varieties. The seeds I offer cannot be surpassed in quality, and those who sow them will be more than pleased with the results. They were carefully saved from the newest, best-improved types, and the plants will bear very large, round flowers in splendid globular trusses upwards of a foot in diameter and in superh shedes of searlet and crimson. foot in diameter, and in superb shades of scarlet and crimson, rose, salmon, cream, veined pink, blush and pure snowy white. Splendid mixture, 4 packets 10 cents, 1 packet 3 cents.

Mr. Park; From a 3-cent packet of your Zonale Geranium seeds I raised fifteen fine plants. Some of them produced the pretitest blooms I ever saw, and there is one especially fine—a very large single pink, shaded white. It is so nandsome everyone wants a slip from it.—Mrs. W. L. Jefferies, Culpepper Co., Vt., Oct. 6, 704. Mr. Park: The largest-flowered and most beautiful Geraniums I ever saw were raised from a 3-cent packet of your seeds.—Rose H. Heft, Hock Co., O., Oct. 7, 04.

Grevillea Robusta Pyramidalis.—A very graceful and satisfactory pot plan for the decoration of the piazza in summer, and the room or window in winter. The leaves are serrate and charmingly arched, are of a silvery shade of green, somewhat coriaceous in texture and not easily injured. Plants are of pyramidal growth, start readily from seeds and soon become fine specimen. It is sometimes called Australian Silk Oak, and is of the easiest culture. 4 pkts 10 cts., 1 pkt 3 cts.

Mr. Park: My Grevillea robusta from your seeds is perfect in shape. It is very striking with its beautiful finely-cut, drooping leaves, and attracts the attention of everyone.— A. E. Story, Clay Co., La., Oct. 5. 1905.

### Heliotrope New Giant.

Special mixture, 4 pkts. 10 cts. 1 pkt. 3 cts.

Special mixture, 4 pkts 10 cts., 1 pkt 3 cts.

The new Large-flowered French Heliotropes re a great improvement upon the old-fashion-d sorts, the plants being more robust and flor-erous, while the flowers are of large size and orne in huge clusters. Plants grow readily rom seeds and like a warm sunny place.

arge-flowered, white in splendid variety.. ....

### Impatiens Sultani Hybrida.

Special mixture, 4 pkts. 10 cts. 1 pkt. 3 cts, This is the Zanzibar Balsam, improved in form and colors. The plants start readily from seeds and begin to bloom as early as the Garden Balsam, becoming bushy and symmetrical, and covered with bright, waxy flowers of various shades from salmon white to dark purple until frost. The plants like a rather sunny place, and are fine as single specimens when planted out, are nne as single specimens when planted out, as well as showy in a group or border. As a pot plant this Balsam is hardly excelled, being easily cared for, and blooming uninterruptedly for many months, summer or winter. In a sunny room of even temperature it is one of the best winter-blooming plants known, and never fails to give unbounded satisfaction.

Roses bright rose, splendid. 5 Ones, whitish salmon. 5

#### Jerusalem Cherry.

lew Hybrid mixed 4 pkts. 10 cts. 1 pkt. 3 cts.

Every flower lover ought to Mr. Park: Every flower lover ought to, we the Jerusalem Cherry, Mine twenty ven inches high, is covered with bloom and it. It is very shown and greatly admired a fruit will remain on until Christmas. Ruth, Ont., Can. Oct. 4, 1905.

#### Lantana, New Dwark

Fine mixed, 4 phts. 10 cts., 1 pkt. 3 cts.

Beautiful bedding and pot plants, very free blooming, easily grown from seeds, and do well in a sunny place. Always in bloom under favorable conditions, and much prized. Finest mixed, 4 pkts. 10 cts. 1 pkt. 3 cts.

Mr. Park: I have good success with -11 of your seeds, and especially Lantana. No flower I ever had gives me so much satisfaction. My plants bloom continuously, and sometimes 15 or 20 clusters. May Preston, Douglas Co., Mo. Oct. 30, 1905.

#### Morrenia Odorata

A graceful evergreen vine of rapid growth, the leaves heart-shaped. pointed, green above and silvery beneath; flowers white star-like and very fragrant. A good vine for window trellis. Price, 4 pkts. 10 cts. 1 pkt. 3 cts.

#### Passiflora.

Passion vine, starts easily from seeds, and splendid for a trellis, or summer-house in summer; flowers odd and beautiful. Protect by lifting and keeping in a frost-proof place, where the winters are severe Blue, scarlet, etc. in special mixture or separate, per packet, 5 cts,

### The Magnificent New FRENCH GIANT PRIMROSES.

Complete Mixture, 3 pkts 12 cts., 1 pkt 5 cts.

The new strain of the Chinese Primrose developed in France is conceded by lovers of Primroses to be superior in vigor and symmetry of growth, while the flowers, borne in huge clusters, are giants in size, attractively fringed, and freely and continuously produced; and show a range of the most distinct and beautiful colors. The French are very successful cultivators of this class of plants, and in past years many very beautiful popular varieties have been brought out by specialists. The race here offered, it is to be thoped, surpasses all previous introductions, and I heartily urge all my friends to give this new race of Primroses a trial, believing that they will be pleased with the results. I am glad to be able to offer the seeds at so low a price, being fortunate to secure a fine stock from a specialist, at a special price. Finest mixed, 3 packets, 12 cts., 1 packet 5 cts

#### Giant Mallow-leaved Varieties.

#### Giant Fern-leaved Varieties.

The Queen, rosy white; the flowers large, finely fringed, delicate and beautiful; splendid foliage:

12 cents, 1 packet.....

Complete mixture of Mallow and Fern-leaved sorts, 3 packets 12 cents, 1 packet......

AGTHe seeds of French Giant Primrose I offer are imported direct from the Primrose specialists in France who developed this splendid race of large-flowered varieties. I offer them with confidence believing that they will prove entirely satisfactory to my patrons. They are at least worthy of a trial.

# Primula Stellata Pyramidalis. Special mixture, 1 packet 10 cents, 3 packets 25 cents.

The New Hybrid Star Primrose, shown in the engraving, is a grand winter-blooming pot plant, surpassing in free-blooming and attractiveness even the well-known Chinese varieties. The plants grow from a foot to eighteen inches high, becoming a pyramidal mass of showy flowers of many colors, and make a fine display throughout the winter season. No pot-plant has been so much praised in England for its beauty and usefulness as the Primrose, and for several years the English seed dealers have retailed the seeds at very high prices. A few plants will fill a window, and their giant form and floriferous grandeur never fail to elicit the highest words of praise. I have pleasure this year in offering splendid new named varieties, and at prices that will certainly make them popular. Those who are fond of winter-blooming Primroses should not fail to add a collection of these new Star varieties to their list. of these new Star varieties to their list.

White Star, improved, pure white, dark foliage ...... 10 

Special mixture of all the choice varieties a superb combination, 3 packets 25 cents, 1 packet 10 cents.

Mr. Park: I must tell the foral sisters about my Primula hybrida pyramidalis stellats that I raised from a package of seeds that I bought of you. There were only ten seeds, but I raised nine plants. The seeds were up ten days after I planted them. I gave some to my friends, and what I kept were covered with blossoms all winter and summer. Some had sixteen and eighteen flower stems on, and tier after tier of blossoms. They were simply grand. All should try them, as they bloom more freely than the Chinese Primroses. Emma Head, Forest Co., Pa., Nov. 1963.

Princela Forbest, the Baby Primrose, one of the most dainty and free-blooming of pot plants. Easily grown from seeds, and comes into bloom in three or four months after starting. Flowers mostly lilac with yellow centre, and produced in whorls continuously. Charming. Lilac, Magenta and Compacta separate, 5 cents each, or in special mixture 4 packets 10 cents, 1 packet 3 cents.

Mr. Park: I planted a packet of your seeds of Primula Forbesi in April and saved six plants, and now they are beauties—such dainty sprays of delicate flowers and buds. They are easily raised and greatly admired. Mrs. Wm. Saltzer, Ogle Co., Ill., Nov. 1, 1903.

Primula Obconica, New Giant. A rival of the Star and Chinese Primroses for winter-blooming is the New Giant Primula Obconica. This sort has flowers almost equal in size to those of the old Chinese kind, while they come in plain and fringed forms, and bear huge clusters held above the foliage on strong stems. I supply white, rose, lavender and carmine, plain or fringed, at 5 cents per packet, or all in special mixture, 4 packets 10 cents, 1 packet 3 cents.

Mr. Fark: Too much praise cannot be given my plants of Primula obconica raised from your seeds. The flowers are so dainty and beautiful. Mrs. E. J. Bailey, P. Q., Canada, Oct. 13, 1905.

### Park's Choice Chinese Primroses.

Special mixture of all varieties, 4 pkts 10 cts. 1 pkt 3 cts.

A Windowful of Park's Choice Chinese Primroses, Grown by Arthur G. Thompson Danville, Ind. Mr. Park: Here is a photograph of our Primroses. If shows how ear it is to have a windowful of the most beautiful winter-blooming plants. These were raised from seeds bought of you last spring. Ead I waited a week of ten days the picture would have looked like a large boquet, the nuck everloping into sank large flowers, and of all colors. The plants have been in bloom all winter and have been admired and praised every day. People promenade past my north window to see the grand display. I am going to try the highest priced seeds of others along with yours next year to see if there is any difference.—Arthur G. Thompson, Danville, Ind., March 22, 1802.

LATER.—Mr. Park: I tried the high-priced Primross seeds of other seedsmen with yours, and find the greatest difference is in the price. The 25,35 and 50-cent packets had a Few more seeds in than your 3 and 5-cent packets, but the two kinds, planted in the same boxes in small rows, grew and bloomed so near alike you could see no difference in the plants or flowers. I can recommend your low-priced seeds to be fully equal to those sold at the highest price by other dealers—Arthur G. Thompson, Danville; Ind. Jan, 8, 1904.

1 offer first-class seeds of the finest strain of Chinese Primroses known, supplying these separate varieties at the extraordinary low prices quoted.

Those preceded by a star can be supplied with either mallow-leaved or fern-leaved foliage. All are fringed.

Mr. Park, I raised eight lovely Chinese Primroses from one 3-cent packet of your seeds. One was pure white and the rest were each a different shade of red, from a pale lavender pink to a deep, rich red, And bloomi—I never saw anything like it! They just bloomed all winter, and were as handsome as could be.—Mrs. Wm. L. Jefferica, Culpepper, Co., Va., Oct. 6 1904

Mr. Park I never had anything prettier than the Chinese Primroses raised from your seeds. They bloomed for ten months in succession and had such bright, cheerful colors. They have such exquisite foliage they would make lovely window plants even if they never bloomed.—Mrs. M. Graybill, Daviess Co., Mo., Oct, 9 1904.

Solanders grandiflora, a very handsome vine from Jamaics, grows fifteen feet high, bearing beautiful trumpet flowers seven inches long, peach-colored, succeeded by egg-like fruits of sweet, sub-acid flavor. Give a large pot of loamy soil, and water freely nntil a good growth has been made, then withhold water entirely till the leaves drop off from drought; after this keep barely moist till signs of renewed growth, when, the water supply increased, the foliage, buds and flowers will soon appear. Per packet, 10 ct.; 3 pkts 25.

Solanum Seaforthianum, an blooming vine, the flowers blue in large panicles. May be bedded out in summer, and winter in the house. Easily grown from seeds; will climb fifteen feet high and bloom continuously summer or winter. Price, 4 packet, 10 cents, 1 packet 3 cents. Sutherlandia frutescens. a leguminous, shrubby pot plant from South Africs; flowers scarlet, in axillary racemes, and very handsome; fruit a curious, papery, inflated, many-seeded pod; grows three feet high. This plant does best in a compact of loam and peat, and is easily raised from seeds, Perpht 5c.

Swainsonia, leguminous vines, of great beauty, both in foliage and flower; nowers pea-like, in racemes, and blue, purple, red, white and yellow in color. Plants start readily from seeds, and thrive in a mixture of sandy loam and peat. Finest mixed, 4 packets 18 cents, 1 packet 3 cents.

Solanum Weatherilli, improved hybrid of Jeruselem Cherry; bushy plants covered with shows fruit; elegant for window pots, 4 pkts 10 cts. 1 pkt 3c,

## Streptocarpus, Charming Hybrids

Special mixture, 4 packets 10 cents, 1 packet 3 cents

I take much pleasure in offering my friends seeds of a very fine strain of Streptocarpus, one of the most beautiful, free-blooming and decorative of pot plants. The plants are easily grown from seeds, as Gloxinias, and require about the same treatment. Seedlings begin to bloom in five months from the date of sowing, and the exquisite Achimene-shaped flowers are borne in clusters, displaying lovely shades of white, rose red, violet and blue, all superbly penciled, blotched and shaded. The skillful window gardener who wishes something new, rare and beautiful should not fail to try this grand new thower. I offer seeds as follows: new flower. I offer seeds as follows:

Special mixture of Hybrid Streptocarpus, finest strain. all colors, 4 packets 10 cents, 1 packet ......

Streptocarpus Wendlandi, blue flowers......Streptocarpus polyanthus, lavender....Streptocarpus Achimene-flowered, mixed......

Note.—The beautiful Streptocarpus, meet strain, an colors, \*pacetes to cents, ! pacetes to cents, ! pacete

#### Smilax, Boston. Price, 4 pkts 10 cts., 1 pkt 3 cts.

This is a beautiful vine for a window trellis or for training upon strings. foliage is graceful, shining green and very pretty. sprays are lovely to mix with delicate flowers for personal adornment, and if the long strings are cut they can be used with fine effect to drape a room or hall. Easily grown.

#### Torenia, New Giant. Finest mixture, 4 pkts 10 cts., 1 pkt 3 cts.

A splendid pot plant of easy culture. Flowers large, blue, white, lavender and yellow. A lovely summer-bloom in g window or porch plant. I offer only the new improved large-flowered va-rieties, of globular habit and far surpassing the older kinds in size and colors.

### Various Miscellaneous Seeds.

GEO. W. PARK, LaPark, Lanaaster County, Pa.

At My Risk.—Remit at my risk by Money Order, Express Order, Draft or Registered Letter.

### Splendid Summer-Blooming Bulbs.

The bulbs I offer are all first-class. All are of the larger sizes, and should not be classed with the small, inferior stock advertised by some firms at a low price. All are delivered by mail, guaranteed, at the prices quoted.

Amaryllis, Algberth strain, the finest of Amaryllis; flowers like A. Johnsoni, but larger, and showing many rich colors and variegations, fine white to deep crimson. Each, large bulbs, 40 cents, per dozen, \$4.00.

Johnsoni, the well-known sort, 30 cents each, \$3.00

to deep crimson. Each, large bulbs, 40 cents, per dozen, \$4.00.

Johnsoni, the well-known sort, 30 cents each, \$3.00 per dozen.

Begonias, Giant Tuberous, White, Scarlet, Crimson, Yellow, Pink, Rose and Orange; large tubers, over three and a half inches in circumference, 6 cents each, or the lot of seven tubers for 35 cents. Smaller tubers, about three inshes in circumference, 5 cents each, or the set for 30 cents.

Begonia, Giant Tuberous, Double, splendid, large, very double flowers in all the leading colors, Red, Scarlet, Rose, Orange and White; fine tubers, 12 cents each, or the five tubers for 50 cents. Smaller tubers, 6 cents each; collection of 5 tubers, different colors, 25 cents.

Say I offer only the fine large, thoroughly-ripened tubers grown for me by Belgian specialists and imported. They can be depended upon to produce the finest, largest flowers of all the new and choicest colors. There are none better. Give fibrous, sandy soil, protection from the wind, and partial shade. In potting, leave the crown of the tuber above the surface.

Caladium, Fancy, finest varieties, named, 35 cents each, \$3.50 per dozen.

These are among the richest of foliage plants. The tubers are naturally small, but each produces many elegant leaves during summer. After potting, water sparingly until growth begins, and avoid chills. They are splendid pot plants for the window, conservatory or porch in summer. When growing, water freely, giveplenty of root room and protect from moon-day sum.

Caladium esculentum, large bulbs, 15 cents each, \$1.50 per dozen. Small bulbs, 16 cents each, 50 cents each, \$1.50 per dozen. A fine ornamental-leaved plant for summer. Likes shade and plenty of water.

Calla, New Semi-dwarf Fragrant. Grows only a foot high, bearing charming, pure white, fragrant flowers; sure to bloom. 20 cents each, \$1.50 per dozen.

Calla, Spotted-leaved, each 10 cents, per dozen \$1.00. A handsome pot plant, or for a shady, moist bed. Foliage nicely spotted with white. Flowers shape of Calla, but smaller; white with p

and freely produced. Price, 15 cts. each, \$1.50 per dozen.

Externmis punctata. a handsome bulbous plant bearing huge spikes of greenish-white, deliciously fragrant flowers during summer. Treat as Gladiolus. Also fine for pots. Price, 25 cts. each, \$2.50 per doz. Also fine for pots. Price, 25 cts. each, \$2.50 per doz. A hardy bulb, throwing up a huge flower scape, 3 feet high; in summer, bearing large, white, drooping flowers. Plant in a raised bed of sandy soil.

Gladiolus, Park's Superb Mixture. This mixture contains all the choice colors and markings in fine proportion, and the bulbs are of first size. They never fail to bloom—the spikes and flowers often marvelous in size and beauty. There is no better mixture offered by anyone. Price, one bulb 3 cts., 6 bulbs 15 cts., 12 bulbs 25 cts., 100 bulbs \$1.90, mailed. By express, not prepaid, \$1.40 per hundred, \$12.50 per thousand.

Gladiolus, Lemoinei, beautiful varieties of all the choice colors in fine mixture, same price as above.

Gladiolus, Second size, but sure to bloom. I can supply the smaller bulbs of the above splendid

ised by some firms at a low price. All are noted.

mixtures as follows; 1 bulb 2 cts., 6 bulbs 10 cts., 12 bulbs 15 cents, or \$1.00 per hundred, mailed. By express, not prepaid, 70 cts. per 100, \$6.50 per 1,000.

Gladiolus. Groff's Hybrids. These are the finest of all Gladiolus. The flowers are of the largest size, the colors the most distinct and varied, and the marking beautiful. I offer a first-class mixture, embracing the latest creations of the hybridist as well as the best of the earlier sorts—shades of White, Yellow, Scarlet, Pink, Violet and (so-called) Blue, in the richest variations. Frice, 5 cts. each, 35 cts. per dozen, \$3.00 per hundred, \$2.200 per thousand. I can also supply the Giant Childisti in richest mixture at same price.

Gladiolus Childsis and Hybrids, the finest named varieties, embracing all colors from white to richest five red, including striped and blotched, all at 4 cents each, or the lot for 35 cents.

Gladiolus chould have a rich, sunny bed. Set the bulbs six inches deep and cultivate well early in the eason. Later mulch freely with stable litter. A few plants of Kenilworth Ivy set among the bulbs will soon carpet the surface of the bed with bronzy green, best with a profusion of pretty lavender flowers.

Glocinius, Glant Belgian Hybrids, White, Blue, Red and Spotted, 10 cents each, \$1.00 per dozen. Kaiser Frederick, scarlet margined white, and Kaiser William, blue margined white, each 10 cts., or both with white, blue, red and spotted, six fine large tubers, only 50 cents.

These are imported from a celebrated Belgian grower, and are fine large tubers of the finest. European

er, and are fine large tubers of the finest European strains. They are magnificent summer flowers of easy culture. Grow in pots, in partial shade, and in a place sheltered from wind.

Hemerocallis flays, the Early-flowering Lemon Lily, and H. Thunbergii, the late-flowering Lemon Lily, both growing two feet high; also H. Sieboldii, the early-flowering sort growing a foot high. Price, 10 cts. each or \$1.00 per dozen. All are hardy and 10 cts. each

the early-flowering sortgrowing a foot high. Price, 10 cts. each or \$1.00 per dozen. All are hardy and beautiful.

\*\*Trie Florentina white, also purplish-blue, each 10 cents, \$1.00 per dozen.

Very hardy, showy, richly scented members of the Iris family. The white is especially desirable for cemetery planting. Both are elegant in the flower border.

\*\*Litisum\*\* auratum, the Gold-band Lily of Japan. Large bulbs, selected, 20 cents each, \$2.00 per dozen.

The finest of Lilies, easily grown and sure to bloom. Hardy, and will live and bloom for years.

\*\*Litisum\*\* lancifolium, Rubrum, red, and Album, white. Large bulbs, 15 cts. each; 3 bulbs 35 cts.

\*\*Lity of the Valley, 4 cents each, 6 for 20 cents, 12 for 35 cents. Fortin's New Glant, best for garden culture, 5 cents, 6 for 25 cents.

\*\*Beautiful foliage and charming racemes of bells. White, deliciously tragrant. Fine for cemetery. \*\*Hardy, will thrive in dense shade.\*\*

\*\*Madeira Vine, 5 cents each, 50 cents per dozen.

\*\*A beautiful, rapid-growing vine. \*\*Foliage massive, flowers white, sweet, and very abundant in fall.

\*\*Montbretia\*\* crocosmiflors, a Gladiolus-like plant, bearing spikes of bloom in summer and autumn. Same care as Gladiolus. 5 cts. each, doz. 50 cts.

\*\*Peonies.\*\* Chinese, Pink, Red, White and mixed, 15 cents each, \$1.00 per dozen.

\*\*Plendid large flowers.\*\* The plants are hardy and increase in beauty from year to year.

\*\*Tigridias\*\*, 5 cents each, 50 cents per dozen. Colors Red, Yellow and White. Large, showy, shell-like flowers, the centre tigred or spotted. Grow a foot high, and a clump of them always shows flowers.

\*\*Titoma\*\* Coralina, a fine everblooming dwarf, hardy variety, 15 cents each, 50 cents per dozen.

\*\*Titoma\*\* Coralina, a fine everblooming dwarf, hardy variety, 15 cents each, \$2.00 per dozen.

\*\*Titoma\*\* Coralina, a fine everblooming dwarf, hardy variety, 15 cents each, \$2.00 per dozen.

\*\*Titoma\*\* Coralina, a fine everblooming dwarf, hardy variety, 15 cents each, \$2.00 per dozen.

\*\*Titoma\*\* Coralina, a fine everblooming

## THE CHOICEST ...ROSES...

PRICE-Fine well-rooted plants. Mailed, 10c, each; \$1.00 per dozen.

COLLOWING is a list of the Choicest Everblooming and Climbing Roses, 26 sorts, and a list of 12 finest Hybrid Perpetuals. I will mail a plant of any variety for 10 cents, or 13 plants, your selection, for \$1.00. The whole lot, 38 plants, with seven additional Roses, my

lection, will be either mailed, prepaid; or expressed with soil on not prepaid, for only \$3.00. They will be mailed latter part of April or early in May, guaranteed to reach you safely. Special: For \$1.00 I will mail a garden Rose collection, my selection, 16 plants of the best varieties for bedding. I have a large variety of Roses and can supply many sorts not here described. My plants are strong, well-grown and sure to please the purchaser.

### THE BEST FOUR ROSES

Are White Maman Cochet, Pink Maman Cochet, Helen Gould (rich crimson), and Etoile de Lyon (rich yellow). Whatever Roses you get, these four should be first on your list. I will send the four, fine, well-rooted plants, for 25 cents. They are described as follows:

Maman Cochet, pink, rosy pink with silvery shadings; very large pointed bud, immense open flower, exculsite in form and fragrance; splendid for beds, and unsurpassed for pots; certainly the queen of pink Tea Roses.

and fine for pots.

Maman Cochet, white, a sport from pink Maman Cochet, having all of its good qualities, but with white flowers; a charming white rose.

Helen Gould, intense carmine Etoile de Lyon, deep, golden yellow; buds and flowers of enormous size, freely and continuously produced; the best yellow Rose for general cultivation.

83 You can make no mistake in buying these four Roses. Altogether they are unsurpassed in beauty of bud, flower, fragrance, free continuous blooming, vigor, foliage and hardiness. Only 254 cents for the lot. If you have any of them select substitutes from the list below.

### **Choicest Hardy Everblooming Roses**

Mrs. Jno. Laing, clear, bright
shell-pink, exquisitely shaded.

Magna Charta, bright rose, suf-fused carmine; grand, popular sort. Paul Neyron, bright, shining pink; an extraordinary variety. Utrich Bruner, bright, cherry-red; semi-double flowers; splendid Vick's Caprice. the only hardy striped rose; soft, satiny-pink.

All of the above Roses are well-grown and in fine condition. All are hardy, and cultural directions will accompany them. For large beds I can supply the plants by the hundred at special rates. I hope my patrons will let me have their liberal Rose orders, and the orders of Rose-loving friends. I believe they will be more than pleased with the fine plants I will send them, and the liberal treatment accorded. Address, George W. Park, LaPark, Lanc. Co., Pa.
